FORMAT STANDARDS "C" SIZE MAPS
(Formerly "B" Size)
NOTES:
(1) Where names of more than one county and/or state are involved, letter on a single line as shown if there is space. Show only State names in title in cases where the lettering would otherwise extend into map headings. The county names will appear elsewhere on the map. Insert the Division or Unit Name when applicable.
(2) When map scale is such that there are three or more township and/or range lines on a map, the designations should be centered with respect to full townships and/or ranges, and as near center as practicable of parts of townships and/or ranges.
(3) It is optional whether the township designation is lettered horizontally or vertically.
(4) Tick marks for at least two latitude and two longitude positions should appear on all maps, the frequency to be governed by the scale. The designation should be omitted if it would fall at a point occupied by a township and/or range designation.
(5) The top scale should always be divided in feet. The bottom scale should always designate metric units.
(6) Show revision and/or posted date as illustrated, using only the latest date such change was made.
