Semiannual Regulatory Agenda

AGENCY: Office of the Secretary, Interior.

ACTION: Semiannual regulatory agenda.

SUMMARY: This notice provides the semiannual agenda of rules scheduled for review or development between October 2002 and April 2003. The

Regulatory Flexibility Act and Executive Order 12866 require publication of the agenda.

ADDRESSES: Unless otherwise indicated, all agency contacts are located at the Department of the Interior, 1849 C Street NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: You should direct all comments and inquiries with regard to these rules to the appropriate agency contact. You should direct general comments relating to the agenda to the Office of Executive Secretariat, Department of the Interior, at the address above or on 202-208-5257 or 202-208-3071.

SUPPLEMENTARY INFORMATION: With this publication, the Department satisfies the requirement of Executive Order 12866 that the Department publish an agenda of rules that we have issued or expect to issue and of currently effective rules that we have scheduled for review.

Simultaneously, the Department meets the requirement of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) to publish an agenda in April and October of each year identifying rules that will have significant economic effects on a substantial number of small entities. We have specifically identified in the agenda rules that will have such effects.

For this edition of the Department's regulatory agenda, we have included the most important significant regulatory actions in the Regulatory Plan, which appears in part II of today's **Federal Register**. The table of contents below lists the Regulatory Plan entries and denotes them by a bracketed bold reference that directs the reader to the appropriate sequence number in part II.

Date: October 3, 2002.

1226. NATURAL RESOURCE DAMAGE ASSESSMENTS: TYPE B PROCEDURES

Priority: Other Significant. Major status under 5 USC 801 is undetermined.

Legal Authority: 42 USC 9651(c)

CFR Citation: 43 CFR 11

Legal Deadline: None

Abstract: CERCLA and the Clean Water Act allow natural resource trustees to bring a claim against a potentially responsible party for resources that have been injured by a release of a hazardous substance. CERCLA requires

that natural resource damage assessment regulations be promulgated and that the regulations be reviewed, and revised as appropriate, every two years. This rulemaking is the biennial review of the administrative process for conducting assessments as well as the so-called type B procedures for determining injury and damages through scientific and economic studies. This rulemaking will also address the calculation of lost non-use values of natural resources, in compliance with State of Ohio v. Department of the Interior, 880 F.2d 432 (D.C. Cir. 1989), which ordered the

Department to allow for the assessment of all reliably calculated values lost as a result of a natural resource injury.

Legal Deadline: None

Abstract: This document proposes to amend procedural rules governing hearings and appeals in public-lands cases. The amendments are necessary to conform the rules to procedural practices contained in decisions of the Interior Board of Land Appeals. The amended rules would provide parties more complete information and more up-to-date procedures than the existing rules.

Abstract: Portions of the U.S. Fish and Wildlife Service manual are being

revised to update policy on the implementation of the Partners for Fish and Wildlife Program. This program provides private landowners with cost-sharing and restoration expertise to restore fish and wildlife habitat. The program does not acquire lands and is a voluntary incentive program. The revisions update policy, incorporate Office of Inspector General recommendations, and clarify technical assistance and cost-sharing in light of changes in U.S. Department of Agriculture conservation programs.

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 668a; 16 USC 704; 16 USC 712; 16 USC 742j-1; 16 USC 1382; 16 USC 1538(d); 16 USC 1539; 16 USC 1540(f); 16 USC 3374; 16 USC 4901 to 4916; 18 USC 42; 19 USC 1202; 31 USC 9701; EO 11911

CFR Citation: 50 CFR 13

Legal Deadline: None

Abstract: The Service proposes to amend 50 CFR part 13, which provides uniform permit procedures relating to the general administration of Service permits, to update the permit application fee schedule. Permit fees have not been revised since 1982. This change is necessary in order to recover a larger percentage of the cost of processing the permits.

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 4222 to 4241; 16 USC 4901 to 4916; 18 USC 42

CFR Citation: 50 CFR 12

Legal Deadline: None

Abstract: The Service proposes to amend regulations in 50 CFR part 12 that establish procedures relating to property seized and administrative forfeiture under various laws enforced by the Service. This revision is intended to provide uniform guidance for the bonded release, appraisal, administrative proceeding petition for remission, and disposal of items subject to forfeiture. Also, these revisions are

intended to provide for greater consistency of Service seizure and forfeiture procedures with those of the U.S. Customs Service. In August 2000, the Civil Asset Forfeiture Reform Act became law. CAFRA mandated many changes to 50 CFR 12 that are incorporated in this proposed rule.

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1531 et seq

CFR Citation: 50 CFR 17

Legal Deadline: Other, Statutory, 12 month finding.

Abstract: We received a petition to list the Tibetan antelope as endangered. We must determine if status review shows that the petitioned action is warranted. If so, we will propose endangered

status for the Tibetan antelope, or chiru (*Pantholops hodgsoni*). The antelope is a wild ungulate native to Tibet, Kashmir, and north-central China. It is threatened by illegal trade in its wool, known as shahtoosh, which is exceptionally fine. The wool and shawls made from it are in great demand on the black market, resulting in the slaughter of thousands of these animals annually. The species has experienced dramatic declines in recent years despite efforts by range countries to control poaching, as well as a prohibition on international commercial trade through listing in appendix I of CITES.

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1531 et seq

CFR Citation: 50 CFR 17

Legal Deadline: Other, Statutory, 12 month finding.

Abstract: We received a petition to reclassify a certain population of the straight-horned markhor from endangered to threatened. Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1531 et seq; 16 USC 4201; PL 99-625

CFR Citation: 50 CFR 17

Legal Deadline: Other, Statutory, Notice of 90-day finding. We must determine if petitioned action is warranted within 90 days or as soon as possible after receipt of petition.

Abstract: Based upon a review of the species in response to a petition, we may propose to list the Beluga sturgeon (*Huso huso*) as endangered. This species historically inhabited the Caspian, Black, Azov and Adriatic Seas and all rivers flowing into them. The Adriatic Sea population has been extirpated, and no wild Beluga sturgeon has been found in the Sea of Azov since the mid 1980s. This species has declined due to fishing pressure. This species is highly valued for its caviar

Abstract: The Service proposes to make revisions to the Rights-of-Way General Regulations in 50 CFR 29 - subpart B. The revisions will correct the address of our Region 5 Office in 50 CFR 29.21-2(c)(5). We will also implement section 1 of Public Law 101-475 by correcting the names of the House and Senate Committees we must notify upon receipt of an application for a right-of-way for an oil and gas pipeline that is 24 inches or more in diameter and again before granting right-of-way. Finally, the proposed revised regulation will delete the reference to a 60-day waiting period after notification of our intent to grant the right-of-way. Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 703 to 712; 16 USC 742a to 742j

CFR Citation: 50 CFR 92

Legal Deadline: None

Abstract: This is the first of annual regulations that will prescribe frameworks for harvest dates, the species that can be taken, and methods and means for subsistence harvest of migratory birds during the spring and summer in Alaska. These regulations were developed under a new process involving the Service, the Alaska Department of Fish and Game, and Alaska Native representatives. A 1916 treaty with Canada established a closed season for the taking of migratory birds between March 10 and September 1. The governments of Canada, Mexico, and the United States recently amended the 1916 treaty and a subsequent 1936 treaty to provide for the legal subsistence harvest of migratory birds and their eggs in Alaska and Canada during the closed season.

Abstract: FWS is proposing to revise the implementing regulations for permits issued under Safe Harbor Agreements and Candidate Conservation Agreements With Assurances. These minor regulatory revisions will make SHAs and CCAAs easier to understand and implement. After practical application of the policy and regulations, we see some inconsistencies and a need to refine/define some terminology.

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1531 et seq

CFR Citation: 50 CFR 17

Legal Deadline: Final, Judicial, January 31, 2002, Settlement agreement.

Abstract: We were ordered by a court to reanalyze the information concerning the listing decision for the Sacramento splittail. Therefore, we have reopened the comment period for this issue. The previous regulatory action that finalized the listing decision for the Sacramento splittail was assigned RIN 1018-AC26, and was completed with the publication of the final rule designating the Sacramento splittail as a threatened species, effective March 10, 1999 (64 FR 5963). Since RIN 1018-AC26 has been completed, we are considering the reopening of the comment period on this issue to be a new regulatory action, which has been assigned this current RIN.

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1531 et seq

CFR Citation: 50 CFR 17

Legal Deadline: NPRM, Judicial, August 2001, Settlement agreement. Final, Judicial, January 2002, Settlement agreement.

Abstract: In August 2001, pursuant to a settlement agreement, we published a proposal to create 16 manatee protection areas in Florida. On January 7, 2002, we published a final rule establishing manatee refuges at two of those sites, while deferring action on making a determination in a final rule on the remaining 14 sites until December 2002. Now, in response to comments received during the public comment period on the August 2001 proposed rule, we are proposing to create an exception to the regulations governing the Barge Canal manatee refuge in Brevard County. Under this exception, parties may apply for authorization to conduct otherwise prohibited activities in the refuge if they can demonstrate to us that the activity can be pursued in such a manner that manatees will not be taken. This exception is being proposed only for the Barge Canal refuge so that

1368. ENDANGERED AND THREATENED WILDLIFE AND PLANTS; ESTABLISHMENT OF A SPECIAL RULE FOR THE CANADA LYNX

Priority: Other Significant

Legal Authority: 16 USC 1531 et seq

CFR Citation: 50 CFR 17.40

Legal Deadline: None

Abstract: The Fish and Wildlife Service plans to propose a special rule under section 4(d) of the Endangered Species Act to provide an alternative voluntary mechanism for the authorization of incidental take of lynx resulting from otherwise lawful trapping or hunting of wildlife other than lynx. The rule will establish criteria that must be satisfied by State or tribal trapping and hunting programs to minimize the likelihood of the incidental take of lynx by trappers and hunters pursuing bobcat or other species.

1369. ENDANGERED AND THREATENED WILDLIFE AND PLANTS; PROPOSED ENDANGERED STATUS FOR THREE PLANTS FROM THE MARIANA ISLANDS AND GUAM

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1531 et seq

CFR Citation: 50 CFR 17

Legal Deadline: Final, Statutory, June 1, 2001.

Abstract: We, the U.S. Fish and Wildlife Service (Service), propose endangered status pursuant to the Endangered Species Act of 1973, as amended (Act), for three plants (no common names): *Nesogenes rotensis*, *Osmoxylon mariannense*, and *Tabernaemontana rotensis*. *Nesogenes rotensis* and *O. mariannense* are found only on the island of Rota in the U.S. Commonwealth of the Northern Mariana Islands (CNMI). *Tabernaemontana rotensis* occurs on both Rota and the United States Territory of Guam.

1370. ENDANGERED AND THREATENED WILDLIFE AND PLANTS; ENDANGERED STATUS FOR 12 SPECIES OF PICTURE-WING FLIES FROM THE HAWAIIAN ISLANDS

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1531 et seq

CFR Citation: 50 CFR 17

Legal Deadline: Final, Judicial, July 31, 2001, Court Order.

Abstract: We propose endangered status pursuant to the Endangered Species Act of 1973, as amended (Act), for 12 species of Hawaiian picture-wing flies—*Drosophila aglaia*, *D. differens*, *D. hemipeza*, *D. heteroneura*, *D. montgomeryi*, *D. mulli*, *D. musaphilia*, *D. neoclavisetae*, *D. obatai*, *D. ochrobasis*, *D. substenoptera*, and *D. tarphytrichia*. These species are found on one or more of the following Hawaiian Islands: Kauai, Oahu, Molokai, Maui, and Hawaii. These 12 species face substantial threats from one or more of the following: habitat degradation, loss of host plants, biological pest control, and predation from alien arthropods.

1371. MIGRATORY BIRD PERMITS; TAKE OF MIGRATORY BIRDS BY FEDERAL AGENCIES

Priority: Other Significant

Legal Authority: 16 USC 703 to 712

CFR Citation: 50 CFR 21.15

Legal Deadline: None

Abstract: According to a recent ruling of the United States Court of Appeals for the District of Columbia Circuit, Federal Agencies are subject to the Migratory Bird Treaty Act (MBTA) and must have authorization under the MBTA to take migratory birds. Our current regulations authorize issuance of permits to take migratory birds for activities such as scientific research, education, and depredation control. For many other activities that result in take of migratory birds, no permits have been available. This rule would allow Federal activities to take migratory birds that are not covered by existing permit regulations, provided certain conditions are met, until more specific regulations can be developed.

Abstract: The National Park Service (NPS) is proposing to amend its regulations concerning motor vehicle operation under the influence of alcohol within units of the NPS. Current NPS regulations prohibit operation with a blood alcohol concentration (BAC) of 0.10 grams or more of alcohol per 100 milliliters of blood or 0.10 grams of alcohol per 210 liters of breath. On March 3, 1998, President Clinton directed the NPS to promulgate regulations adopting a stricter limit of 0.08 grams BAC within units of the NPS.

Abstract: Public Law 105-391 became effective on November 13, 1998. The new Act mandates revised procedures for issuing commercial use authorizations. Section 417 of Public Law 105-391 requires that the Secretary promulgate implementing regulations as soon as practicable after the effective date of the Act. Existing regulations governing commercial use within National Parks are not adequate to administer the provisions of the new statute and must be revised to reflect new requirements.

Abstract: This is an interim regulation to implement Presidential Proclamation No. 7932, which established the Virgin Islands Coral Reef National Monument. This regulation prohibits extractive uses, with some exceptions, and anchoring within the monument, and expands the boundaries of Buck Island Reef National Monument. The regulation also implements Presidential Proclamation No. 7399, which prohibits all extractive uses and boat anchoring, except in deep sand areas (all other anchoring is subject to permit) at Buck Island. Both proclamations require NPS to prepare management plans for each park within three years. We are soliciting comments on this interim rule and will take them into account in developing the final rule once we have completed the general management plans.

Abstract: This rule streamlines the appeals process to facilitate processing appeals within the 33-month deadline required by the Federal Oil and Gas Royalty Simplification and Fairness Act of 1996 (RSFA). It also implements the requirements of OMB Circular A-25, which establishes guidelines for Federal agencies to assess fees to cover the costs of Government-provided services or benefits beyond those accruing to the general public. The proposed rule will: (1) require the appellant to file its Notice of Appeal and Statement of Reasons directly with the MMS Appeals Division and file copies with the office that issued the order; (2) implement most of the recommendations made by the Royalty Policy Committee; (3) eliminate the requirement for an MMS field report containing MMS's arguments; (4) clarify the right of the States and tribes to participate in the appeals process; and (5) provide for settlement negotiations as required in RSFA.

1461. DEALING WITH SUSTAINED CASING PRESSURE

Priority: Substantive, Nonsignificant

Legal Authority: 43 USC 1331

CFR Citation: 30 CFR 250

Legal Deadline: None

Abstract: This proposed rulemaking amends subpart E (Oil and Gas Well-Completion Operations) of MMS operating regulations. It describes procedures for dealing with sustained casing pressure in oil and gas wells on the Outer Continental Shelf. Currently lessees must request a departure from

MMS regulations to operate a well that has sustained casing pressure. When granting a departure, MMS requires that lessees perform periodic checks and evaluations to ensure that the pressure is not a danger to personnel, equipment, or the environment. This proposed rule will codify these procedures and ensure uniform regulatory practices among MMS regional offices. The proposed changes will also help ensure that lessees will continue to conduct operations in a safe manner.

Abstract: MMS is proposing to modify requirements governing rights-of-use

and easement and pipeline rights-of-way in the Outer Continental Shelf. These changes will increase rental rates for pipeline rights-of-way and establish rentals for rights-of-use and easement. The proposed rule will also allow MMS to charge additional payment when the right-of-use and easement or the pipeline right-of-way prevents MMS from making the area available to other companies for exploration and possible development and production. This change is needed because of requests by lessees and pipeline right-of-way holders to use large areas outside of the area covered by their lease and pipeline right-of-way for accessory structures.

Legal Authority: 43 USC 1331

CFR Citation: 30 CFR 250 subpart A

Legal Deadline: None

Abstract: This rule will amend 30 CFR part 250 by adding a new definition, revising existing definition, clarifying or expanding certain requirements, and making administrative changes. We are adding a new definition for the term "production in paying quantities" to enable us to determine how much production qualifies as lease holding production. We are specifying the submission or from progress reports and final reports for suspensions of production and suspensions of operations to ensure that the lessee/operator is diligent in pursuing performance of their lease. We are adding a new section pertaining to notifying MMS on production status. We are reorganizing the forms data release table and adding entries for three new forms. We are expanding the requirements pertaining to submitting digital data.

Legal Authority: 43 USC 1331 et seq

CFR Citation: 30 CFR 203

Legal Deadline: None

Abstract: The recently published final rule 1010-AC71 created a process for

certain leases (those that are inadequately helped by our formal relief systems) to seek special royalty relief. However, overly restrictive eligibility criteria may exclude some leases that fulfill statutory purposes while redundant criteria may include other leases that do not fit statutory purposes. This rule will refine the eligibility criteria to include marginal discoveries in the shallow water part of the Gulf of Mexico that may offer meaningful conservation or infrastructure preservation benefits. The revision will also disallow a royalty relief request by a lease or project that does not promote wider program goals or is only temporarily unable to benefit from a formal royalty relief program.

1472. OIL AND GAS AND SULPHUR OPERATIONS IN THE OUTER CONTINENTAL SHELF—SAFETY MEASURES AND PROCEDURES FOR PIPELINE MODIFICATIONS AND REPAIRS

Priority: Substantive, Nonsignificant**Legal Authority:** 43 USC 1331 et seq**CFR Citation:** 30 CFR 250**Legal Deadline:** None

Abstract: The rule will address problems that arise out of the fact that eventually all pipeline valves leak internally. This is due to abrasion and deposition of operational residues on valve seats. Internal valve leakage poses a potential safety problem to offshore workers at the time pipeline repairs are performed because hydrocarbons and pressure differentials in the lines can pose a significant hazard of fire and explosion. The rule will require that lessees and operators consider and submit in writing the measures they plan to take and the procedures they plan to follow to ensure the safety of company or contract workers and to prevent pollution before beginning a pipeline modification or repair, and it will amend section 250.1006(b)(1) by requiring that a blind flange be installed at the platform end of any pipeline taken out of service to prevent seepage into the line through leaking valves.

The rule would also allow selective disclosure of geological and geophysical data and information and allow selective disclosure of data and information generated on a lease to persons with a direct interest in issues concerning field determination and royalty relief eligibility.

Priority: Substantive, Nonsignificant

Legal Authority: 30 USC 1201 et seq

CFR Citation: 30 CFR 700; 30 CFR 740; 30 CFR 750

Legal Deadline: None

Abstract: OSM regulates mining on Indian lands and the State regulates mining on non-Indian lands. OSM proposes to amend its regulations to clarify that the definition of "Indian lands" at 30 CFR 700.5 includes individual Indian trust allotments located within an approved tribal land consolidation area. The proposed clarification was required under the terms of a settlement agreement between the Department of the Interior and the Navajo Nation and Hopi Tribe to settle the tribes' challenges to a May 1989 Indian lands rulemaking. OSM has developed a preliminary draft rule that specifies that allotted lands would qualify as Indian lands for purposes of the Surface Mining Control and Reclamation Act when OSM determines, on a case-by-case basis, that the allotments are supervised by an Indian tribe.

Abstract: This rule will eliminate the requirement to publish a Federal

Register notice announcing the receipt of, and seeking comments on, applications for construction of public facilities that are funded from the abandoned mine land fund. The publication requirement will become a discretionary action. Previous Federal Register notices have generated little interest from the public and have added delays to the construction of AML projects.

Abstract: BLM proposes to make two minor amendments to the recordable disclaimer regulations at 43 CFR 1864.1-1 and .1-3. Presently the regulations state that any present owner of record may file an application to have a disclaimer of interest issued. Neither FLPMA nor its implementing regulations define the term present owner of record. Neither the Federal Courts nor the Interior Board of Land Appeals have defined or elaborated on the phrase. As such, BLM wishes to amend the regulations to eliminate the phrase. Such an amendment would prevent any legal challenge to BLM's interpretation of the phrase to include state applications.

Abstract: This rule increases minimum bond amounts for individual lease bonds and statewide bonds. It changes BLM's current policy of terminating only the period of liability of bonds. Under the new rule, we will cancel bonds after determining that all lease obligations are met. Finally, the rule clarifies the responsibilities of record title holders and operating rights owners. The final rule is based upon a portion of a proposed rule published with the RIN 1004-AC94.

1514. COALBED METHANE DEVELOPMENT

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 13368

CFR Citation: 43 CFR 3170

Legal Deadline: Final, Statutory, October 24, 1995.

Abstract: The rule will implement section 1339 of the Energy Policy Act of 1992. It will prevent conflicts in ownership of coalbed methane from impeding development of that resource

by requiring pooling of development and payment of the proceeds into an escrow account until the ownership issue is resolved by a State entity of competent jurisdiction. The rule will also allow States to avoid the Federal regulations by promulgating their own regulations that substantially comply with Federal requirements.

1516. OIL AND GAS LEASING AND OPERATIONS

Priority: Other Significant

Legal Authority: 30 USC 181 et seq

CFR Citation: 43 CFR 3100

Legal Deadline: None

Abstract: This rule will revise BLM's current Federal oil and gas leasing and operations regulations, except those concerning drainage (section 3100.2-2), combined hydrocarbon leasing (part 3140) and oil and gas leasing in the National Petroleum Reserve—Alaska (part 3130). The rule will: (1) Cite industry standards and incorporate them by reference rather than repeat those standards in the rule; (2) incorporate the requirements of the Onshore Oil and Gas Orders and national notices to lessees into the regulations to eliminate overlap with current regulations; (3) use performance standards in certain places instead of prescriptive requirements to allow more flexibility for operators and to protect the environment and Federal royalty interests; and (4) eliminate redundancies, clarify procedures and regulatory requirements and streamline procedures.

Abstract: BLM proposes to amend its regulations that govern administrative review procedures for protests of proposed decisions contested appeals of BLM decisions, and hearings on the record. The proposed regulations would provide more consistent procedures for administrative review of BLM decisions, and would clarify when and how BLM decisions go into effect and whether an appeal will stay the effectiveness of a BLM decision.

Abstract: This rule will provide that a mineral examination is not required

for claims on specific categories of withdrawn lands in Alaska before approving plans of operations or allowing notice-level mining to begin, but will be discretionary with BLM on those lands. For mining claims on lands withdrawn for inclusion in land conservation systems like wilderness, wild and scenic rivers, etc., mineral examinations will remain mandatory.

Abstract: This rule will amend existing regulations by removing certain provisions of the regulations and restoring others to those in effect on January 19, 2001, intending to prevent unnecessary or undue degradation of BLM-administered lands by mining operations authorized under the mining laws. The approach BLM will take will balance the Nation's need to maintain reliable sources of strategic and industrial minerals, while ensuring protection of the environment and natural resources on public lands. The rule will make the hardrock mining regulations consistent with the recommendations of the National Research Council and protect the Federal Government from financial risk if operators are unable to perform reclamation.
