Minerals Management Service

Pacific Outer Continental Shelf Region

AGENCY: Mineral Management Service, Interior.

ACTION: Notice of the availability of environmental documents prepared for Outer Continental Shelf (OCS) pipeline installation proposal on the Pacific OCS.

SUMMARY: The Minerals Management Service (MMS), in accordance with Federal regulations (40 CFR Section 1501.4 and Section 1506.6) that implement the National Environmental Policy Act (NEPA), announces the availability of a NEPA-related Environmental Assessment prepared by the MMS for pipeline installation activities proposed on the Pacific OCS. This listing includes the only proposal for which a Finding of No Significant Impact (FONSI) was prepared by the Pacific OCS Office in the 3-month period preceding this Notice.

Proposal

Exxon proposes to install a 12.75 inch outside diameter (OD) gas pipeline which would be approximately 7 miles in length in the Santa Ynez Unit (SYU) from Platform Heritage to Platform Harmony. This proposal is a change from the currently approved 17-mile gas pipeline which was planned to be installed from Platform Heritage to the Las Flores Canyon onshore facility. Compared to the currently approved project, the proposed modification would reduce the length of the pipeline needed to be installed by 10 miles, since the currently-proposed pipeline would not be installed all the way to shore. The proposed pipeline would be placed in the same surveyed area as the currently-installed Platform Heritage to Platform Harmony oil emulsion pipeline and power cables. The proposed gas pipeline would be installed in water depths ranging from 1,090 to 1,350 ft. The pipeline would be used to transport
