

mitigation measures similar to those found in the NFP. This alternative was not analyzed in detail because it would result in excessive direct and indirect costs to Crown Pacific. These excessive costs do not meet the purpose in this Federal action, which is to provide protection and conservation to listed and proposed species and their habitats to the extent intended under 10(a)(1)(B) of the ESA, while allowing Crown Pacific to fulfill its forest management and timber harvest mission in a practical manner.

The No Action, Proposed Action, Late-Successional Dependent Species and Anadromous Fish alternatives are analyzed in detail in the draft EIS. The CCA Alternative and NFP Alternative were dismissed from detailed analysis.

This notice is provided pursuant to section 10(a) of the ESA, and NEPA regulations. The Services will evaluate the application, associated documents, and comments submitted thereon to determine whether the application meets the requirements of the ESA and NEPA. If it is determined that the requirements are met, Permits will be issued for the incidental take of listed species. The final permit decision will be made no sooner than 60 days from the date of this notice.
