

### Recommended Actions To Meet These Responsibilities

HUD encourages jurisdictions that are recipients of funds covered by the Consolidated Plan to make outreach efforts to ensure that persons with disabilities are consulted and have an equal opportunity to participate in developing the jurisdiction's analysis of needs and plans for the use of Federal and other resources. HUD staff in the State and Area Community Planning and Development and Fair Housing and Equal Opportunity Offices can be consulted in helping develop outreach efforts and a significant amount of information is found on HUD's homepage on the Internet at [www.hud.gov](http://www.hud.gov).

During the new five-year Consolidated Plan cycle that begins in Fiscal Year 2001, Consolidated Plan jurisdictions are strongly encouraged to periodically review and update their AIs, as appropriate, to give the same attention to impediments to fair housing choice for persons with disabilities as is provided for other bases of discrimination such as race that have been prohibited by the Act since its inception in 1968. HUD in its review of Annual Action Plan submissions and during on-site reviews, will consider whether jurisdictions are giving appropriate attention in their Action Plans to compliance with the accessibility requirements of the Act by both private and public housing providers.

Jurisdictions are also encouraged to take other actions to advance fair housing choice for persons with disabilities in support of their certification to affirmatively further fair housing. Recent HUD House Appropriations report language would direct HUD, when reviewing Consolidated Plans, to take into consideration a community's adoption of a building code that satisfies the Act's accessibility requirements along with the community's other efforts to remove impediments to fair housing (see H. Rep. 106-674).

With respect to building codes, HUD encourages elected officials and those engaged in housing and community development programs to determine whether the jurisdiction's building code is inconsistent in any respect with the Act's accessibility requirements. HUD's recently completed review of the four model building codes for consistency with the Act can assist with this determination because most local building codes are derived from one or more national model codes. HUD's final report reviewing the model building

codes was published in the **Federal Register** on March 23, 2000 (65 FR 15740).

In its March 23, 2000 final report, HUD identified those areas of the model building codes that were not consistent with the accessibility requirements of the Act, and included recommended language for addressing these variations. Since that time, HUD has been working with the model code organizations and other interested persons in developing proposed code language to address the findings in the Department's final report with respect to the International Building Code 2000.

HUD also encourages jurisdictions to find ways to inform builders and architects as early as possible in the project design phase, but certainly no later than the issuance of a building permit, of the need to comply with the accessibility requirements of the Act.
