Receipt of Applications for Permit

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of applications for permit.

SUMMARY: The public is invited to comment on the following applications to conduct certain activities with endangered species and/or marine mammals.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Health Resources and Services Administration (HRSA) publishes abstracts of information collection requests under review by the Office of Management and Budget, in compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). To request a copy of the clearance requests submitted to OMB for review, call the HRSA Reports Clearance Office on (301) 443-1129.

The following request has been submitted to the Office of Management and Budget for review under the Paperwork Reduction Act of 1995:

Proposed Project: Web-based Semi Annual Report (SAR): NEW

The Health Resources and Services Administration (HRSA), Bureau of

Primary Health Care (BPHC) plans to collect the annual reporting requirements for the primary care grantees funded by BPHC using a web-based Semi Annual Report (SAR). The SAR includes reporting requirements for grantees of the following primary care programs: State Primary Care Associations and State Primary Care Offices. Authorizing legislation is found in Public Law 104-299, Health Center Consolidation Act of 1996, enacting Section 330 of the Public Health Service Act.

BPHC collects data on its programs to ensure compliance with legislative mandates and to report to Congress and policymakers on program accomplishments. To meet these objectives, BPHC requires a core set of information collected semi-annually that is appropriate for monitoring and evaluating performance and reporting on annual trends. The SAR, completed by all grantees, provides data on services, characteristics of populations, leveraged funds, and services that fall within the scope of the grant.

The estimated burden is as follows:

DATES: Written data, comments or requests must be received by May 3, 2002.

ADDRESSES: Documents and other information submitted with these applications are available for review, subject to the requirements of the Privacy Act and Freedom of Information Act, by any party who submits a written request for a copy of such documents within 30 days of the date of publication of this notice to: U.S. Fish and Wildlife Service, Division of Management Authority, 4401 North Fairfax Drive, Room 700, Arlington, Virginia 22203; fax 703/358-2281.

Notice of Emergency Exemption Issuance of Endangered Species Recovery Permit

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of emergency exemption issuance.

SUMMARY: The following applicant has been issued a scientific research permit to conduct certain activities with an endangered species pursuant to section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (16 USC 1531 *et seq.*).

FOR FURTHER INFORMATION CONTACT: Linda Belluomini, Permits Biologist at 503-231-2063.

SUPPLEMENTARY INFORMATION: The Washington Department of Fish and Wildlife (WDFW) has been authorized via permit number TE-050644, by the U.S. Fish and Wildlife Service's Pacific Region, to increase, the area in which it surveys, captures, and handles individuals from the Columbia Basin distinct population segment of the pygmy rabbit (*Brachylagus idahoensis*; pygmy rabbit), and to maintain firebreaks located in their habitat in conjunction with research, a captive propagation program, and to reduce the likelihood of catastrophic fire throughout the species range. We issued this permit for the purpose of enhancing the propagation and survival of the

pygmy rabbit. The 30-day public comment period required by the Endangered Species Act (Act) was waived in accordance with section 10(c) of the Act upon a determination that an emergency affecting the health and life of specimens of pygmy rabbit exists, and that no reasonable alternative is available to the applicant.

The pygmy rabbit has undergone dramatic annual declines since 1998, and the entire wild portion of this population now consists of fewer than 50 individuals from just 1 known colony on State land in Douglas County, Washington. As part of a captive breeding program, initiated by the WDFW during the spring of 2001, an additional 14 individuals from this population are being held in captivity, including 5 offspring born at the holding facility. The capture of additional animals from the wild, throughout the species range, will help to ensure genetic diversity of the species by complementing the genetic profiles and potential breeding scenarios of those already in captivity. Any pygmy rabbits that are not considered essential to the captive breeding program will be left in the wild, and ongoing management to protect this portion of the population will continue.

Pygmy rabbits may experience significant mortality due to increased susceptibility to wild fires if fire breaks located within their habitat are not properly maintained. These firebreaks need to be maintained before reproductive behavior is exhibited and especially prior to young of the year being born as early as mid-April.

Delay in the WDFW's planned activities due to the 30-day public comment period could jeopardize the success of the captive breeding program and, ultimately, the long-term security of the pygmy rabbit.
