

improvement of medication assisted addiction treatment; (7) establishes and maintains collaborative relationships with other Federal, State, and local government agencies, national organizations, and constituency groups involved in activities associated with medication assisted treatment; (8) maintains internal expertise and collaborates with national experts in the development of CSAT, SAMHSA and DHHS treatment standards and guidelines concerning medication assisted treatment; (9) provides national leadership and advice on medication assisted treatments and on related policy issues; (10) supports the Federal Interagency Narcotic Treatment Policy Review Board; and (11) develops funding levels for division programs and activities.

II. *Section M.30, Order of Succession:* During the absence or disability of the Administrator, SAMHSA, or in the event of a vacancy in that office, the first official listed below would perform the duties of the Administrator, except that during a planned period of absence, the Administrator may specify a different order of succession: (1) Deputy Administrator; and (2) Executive Officer, SAMHSA.

III. *Section M.40, Delegations of Authority:* All delegations and redelegations of authority to officers and employees of SAMHSA which were in effect immediately prior to the effective date of this restructuring and layering shall continue in effect pending further redelegation, providing they are consistent with the reorganization.

These organizational changes are effective July 1, 2002.

Dated: June 25, 2002.

## DEPARTMENT OF THE INTERIOR

### Fish and Wildlife Service

#### Notice of Availability of a Draft Habitat Conservation Plan and Receipt of an Application for an Incidental Take Permit for Construction of a Single-Family Residential Home Site on the Lefever Property, Black Forest, CO

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of availability and receipt of application.

**SUMMARY:** This notice advises the public that Thomas Lefever (Applicant) has applied to the U.S. Fish and Wildlife

Service (Service) for an incidental take permit pursuant to section 10(a)(1)(B) of the Endangered Species Act (Act) of 1973, as amended. The proposed permit would authorize the incidental take of the Preble's meadow jumping mouse (*Zapus hudsonius preblei*), federally-listed as threatened, through loss and modification of its habitat associated with construction and occupation of a residential home site at the Lefever Property, Black Forest, Colorado. The duration of the permit would be 5 years from the date of issuance.

We announce the receipt of the Applicant's incidental take permit application that includes a combined Environmental Assessment/Habitat Conservation Plan (EA/HCP) for the Preble's meadow jumping mouse (Preble's) for the Lefever Property. The proposed EA/HCP is available for public review and comment. It fully describes the proposed project and the measures the Applicant would undertake to minimize and mitigate project impacts to the Preble's.

The Service requests comments on the EA/HCP for the proposed issuance of the incidental take permit. We provide this notice pursuant to section 10(a) of the Act and National Environmental Policy Act regulations (40 CFR 1506.6). All comments on the EA and permit application will become part of the administrative record and will be available to the public.

**DATES:** Written comments on the permit application and EA/HCP should be received on or before September 6, 2002.

**ADDRESSES:** Comments regarding the permit application and EA/HCP should be addressed to LeRoy Carlson, Field Supervisor, U.S. Fish and Wildlife Service, Colorado Field Office, 755 Parfet Street, Suite 361, Lakewood, Colorado 80215.

**FOR FURTHER INFORMATION CONTACT:** Ms. Kathleen Linder, Fish and Wildlife Biologist, Colorado Field Office, telephone (303) 275-2370.

#### SUPPLEMENTARY INFORMATION:

##### Document Availability

Individuals wishing copies of the HCP and associated documents for review should immediately contact the above office. Documents also will be available for public inspection, by appointment, during normal business hours at the above address.

##### Background

Section 9 of the Act and Federal regulation prohibit the "take" of a species listed as endangered or threatened. Take is defined under the

Act, in part, as to kill, harm, or harass a federally listed species. However, the Service may issue permits to authorize "incidental take" of listed species under limited circumstances. Incidental take is defined under the Act as take of a listed species that is incidental to, and not the purpose of, the carrying out of an otherwise lawful activity under limited circumstances. Regulations governing permits for threatened species are promulgated in 50 CFR 17.32.

The Lefever Property is located at 12715 Kaibab Court, Abert Estates Lot 4, along Black Squirrel Creek, in the Town of Black Forest, El Paso County, State of Colorado. The project site is 5.4 acres, but the proposed project will directly impact a maximum of 0.56 acre that may result in incidental take of the Preble's. Of the total amount of impacted acreage, 0.215 acre will be temporarily disturbed and will be revegetated. An HCP has been developed as part of the preferred alternative. The proposed HCP will allow for the incidental take of the Preble's by permitting a single family residence to be constructed in an area that may be periodically used as foraging or hibernation habitat.

Alternatives considered in addition to the Proposed Action, included waiting for the approval of the El Paso County Regional Habitat Conservation Plan, and no action. The draft EA analyzes the onsite, offsite, and cumulative impacts of the proposed project and all associated development and construction activities and mitigation activities on the Preble's, other threatened or endangered species, vegetation, wildlife, wetlands, geology/soils, land use, water resources, air and water quality, or cultural resources. None of the proposed impacts occur within the riparian corridor. All of the proposed impacts are in upland areas outside of the 100-year floodplain. The Applicant, using the Service's definition of Preble's habitat, has determined that the proposed project would impact approximately 0.56 acre of potential Preble's habitat. The mitigation will likely provide a net benefit to the Preble's mouse and other wildlife by improving or creating new riparian areas, planting of native shrubs, and protecting existing habitat along Black Squirrel Creek from any future development.

Only one federally listed species, the threatened Preble's, occurs on site and has the potential to be adversely affected by the project. To mitigate impacts that may result from incidental take, the HCP provides mitigation for the residential site by protection of the

Black Squirrel Creek corridor onsite and its associated riparian areas from all future development through the replanting of 0.215 acre of temporarily disturbed grassland and the protection of an additional 4.3 acres on an existing conservation easement with enhancement of 0.89 acre through native shrub planting. Measures will be taken during construction to minimize impact to the habitat, including the use of silt fencing to reduce the amount of sediment from construction activities that reaches the creek. All of the proposed mitigation area is within the boundaries of the Lefever property, all of which is included in the drainage basin of Black Squirrel Creek.

This notice is provided pursuant to section 10(c) of the Act. We will evaluate the permit application, the EA/HCP, and comments submitted therein to determine whether the application meets the requirements of section 10(a) of the Act. If it is determined that those requirements are met, a permit will be issued for the incidental take of the Preble's in conjunction with the construction and occupation of a single-family residential lot on the Lefever Property. The final permit decision will be made no sooner than 60 days from the date of this notice.

Dated: June 19, 2002.

## DEPARTMENT OF THE INTERIOR

### Fish and Wildlife Service

#### North American Wetlands Conservation Act: Request for Small Grants Proposals for Year 2003

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of request for proposals.

**SUMMARY:** The purpose of this notice is to advise the public that we, the U.S. Fish and Wildlife Service (Service) and the North American Wetlands Conservation Council (Council), are currently entertaining proposals that request match funding for wetland and wetland-associated upland conservation projects under the Small Grants program. Projects must meet the purposes of the North American Wetlands Conservation Act of 1989, as amended. We will give funding priority to projects from new grant applicants with new partners, where the project ensures long-term conservation benefits. However, previous Act grantees are

eligible to receive funding and can compete successfully on the basis of strong project resource values.

**DATES:** Proposals must be postmarked no later than Friday, November 29, 2002.

**ADDRESSES:** Address proposals to: Division of Bird Habitat Conservation, U.S. Fish and Wildlife Service, 4401 North Fairfax Drive, Suite 110, Arlington, Virginia 22203, Attn: Small Grants Coordinator.

**FOR FURTHER INFORMATION CONTACT:** Dr. Keith A. Morehouse, Small Grants Coordinator, or Office Secretary, Division of Bird Habitat Conservation, 703.358.1784; facsimile 703.358.2282.

**SUPPLEMENTARY INFORMATION:** The purpose of the 1989 North American Wetlands Conservation Act (NAWCA), as amended (16 U.S.C. 4401 *et seq.*) is, through partnerships, to promote long-term conservation of North American wetland ecosystems and the waterfowl and other migratory birds, fish and wildlife that depend upon such habitats. Principal conservation actions supported by NAWCA are acquisition, enhancement and restoration of wetlands and wetlands-associated uplands habitat.

Initiated in 1996, the underlying objective of the NAWCA-based Small Grants program is to promote long-term wetlands conservation activities through encouraging participation by new grantees and partners who may not otherwise be able to compete in the Standard Grants program. We also hope that successful participants in the Small Grants program will be encouraged to participate as a grantee or partner in the Standard Grants program. Over the first seven years of the Small Grants program, 553 proposals requesting a total of approximately \$19.8 million competed for funding. Ultimately, 164 projects were funded over this period for about \$6.7 million. For 2003, with the approval of the Migratory Bird Conservation Commission, we have made the Small Grants program operational at a base level of \$1.0 million. Between \$1.0 and \$2.0 million in Small Grants projects may be funded. However, ultimately, the level of Small Grant funding depends upon the quality of the pool of grant proposals.

To be considered for funding in the 2003 cycle, proposals must have a grant request no greater than \$50,000. We will accept all wetland conservation proposals that meet the requirements of the Act. However, considering appropriate proposal resource values, we will give funding priority to projects from new grant applicants (individuals or organizations who have never

received a NAWCA grant) with new partners, where the project ensures long-term conservation benefits. This priority system does not preclude former NAWCA grant recipients from receiving Small Grants funding; ultimately, project resource value is the critical factor in deciding which projects receive funding. Also, projects are likely to receive a greater level of attention if they are part of a broader related or unrelated effort to bring or restore wetland or wetland-associated upland conservation values to a particular area or region.

In addition, proposals must represent on-the-ground projects, and any overhead in the project budget must constitute 10 percent or less of the grant amount. The anticipated magnitude of wetlands and wildlife resources benefits that will result from project execution is an important factor in proposal evaluation, and there should be a reasonable balance between acreages of wetlands and wetland-associated uplands. Mitigation-related projects may be precluded from consideration, depending upon the nature of the mitigation.

Please keep in mind that NAWCA and matching funds may be applied only to wetlands acquisition, creation, enhancement, and/or restoration; they may not be applied to signage, displays, trails or other educational features, materials and equipment, even though the goal of the project may ultimately be to support wetland conservation education curricula. Projects oriented toward education are not ordinarily eligible for NAWCA funding because education is not a primary purpose of the Act. However, acceptable project outcomes can include educational benefits resulting from conservation actions. Research is also not a primary purpose of the Act, and research proposals are not considered for funding.

Even though we require less total application information for Small Grants than we do for the Standard Grants program, Small Grant proposals must have clear explanations and meet the basic purposes given above and the 1:1 or greater non-Federal matching requirements of the NAWCA. Small Grants projects must also be consistent with Council-established guidelines, objectives and policies. All non-Federal matching funds and proposed expenditures of grant funds must be consistent with Appendix A of the Small Grants instructions, "Eligibility Requirements for Match of NAWCA Grant and Non-Federal Funds." Applicants must submit a completed Standard Form 424, Application For
