

because denial of an APA rulemaking petition is not a "significant regulatory action" subject to review by OMB under E.O. 12866.

B. Regulatory Flexibility Act

Pursuant to section 605(b) of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), the Agency hereby certifies that this denial will not have a significant impact on a substantial number of small entities. This determination is based on the fact that this denial will not result in any adverse economic impacts on the facilities subject to reporting under EPCRA section 313, regardless of the size of the facility.

C. Paperwork Reduction Act

This petition denial will not reduce or increase the overall reporting and record keeping burden estimate provided for the TRI program, and does not require any review or approval by OMB under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.* As such, it is not necessary for EPA to determine the total TRI burden associated with this action.

The reporting and record keeping burdens associated with TRI are approved by OMB under OMB No. 2070-0093 (Form R, EPA ICR No. 1363) and under OMB No. 2070-0145 (Form A, EPA ICR No. 1704). The current public reporting burden for TRI is estimated to average 52.1 hours for a Form R submitter and 34.6 hours for a Form A submitter. These estimates include the time needed for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this information collection appears above. In addition, the OMB control number for EPA's regulations, after initial display in the final rule, are displayed on the collection instruments and are also listed in 40 CFR part 9.

D. Unfunded Mandates Reform Act and Executive Orders 13084 and 13132

Since this action involves the denial of an APA rulemaking petition, it does not impose any enforceable duty, contain any unfunded mandate, or otherwise have any effect on small governments as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4). For the same reason, it is not subject to the requirement for prior consultation with Indian tribal governments as specified in Executive

Order 13084, entitled Consultation and Coordination with Indian Tribal Governments (63 FR 27655, May 19, 1998). Nor will this action have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, entitled Federalism (64 FR 43255, August 10, 1999).

E. Executive Order 12898

Pursuant to Executive Order 12898, entitled Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations (59 FR 7629, February 16, 1994), the Agency must consider environmental justice related issues with regard to the potential impacts of this action on environmental and health conditions in low-income populations and minority populations. The Agency has determined that this action will not result in environmental justice related issues.

F. Executive Order 13045

Pursuant to Executive Order 13045, entitled Protection of Children from Environmental Health Risks and Safety Risks (62 FR 19885, April 23, 1997), if an action is economically significant under Executive Order 12866, the Agency must, to the extent permitted by law and consistent with the Agency's mission, identify and assess the environmental health risks and safety risks that may disproportionately affect children. Since this action is not economically significant under Executive Order 12866, this action is not subject to Executive Order 13045.

G. National Technology Transfer and Advancement Act

Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA) (15 U.S.C. 272 note) directs EPA to use voluntary consensus standards in its regulatory activities unless doing so would be inconsistent with applicable law or impractical. Voluntary consensus standards are technical standards (e.g., materials specifications, test methods, sampling procedures, etc.) that are developed or adopted by voluntary consensus standards bodies. The NTTAA directs EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards.

This action does not involve technical standards, nor did EPA consider the use

of any voluntary consensus standards. In general, EPCRA does not prescribe technical standards to be used for threshold determinations or completion of EPCRA section 313 reports. EPCRA section 313(g)(2) states that "In order to provide the information required under this section, the owner or operator of a facility may use readily available data (including monitoring data) collected pursuant to other provisions of law, or, where such data are not readily available, reasonable estimates of the amounts involved. Nothing in this section requires the monitoring or measurement of the quantities, concentration, or frequency of any toxic chemical released into the environment beyond that monitoring and measurement required under other provisions of law or regulation."

List of Subjects in 40 CFR Part 372

Environmental protection, Community right-to-know, Reporting and recordkeeping requirements, and Toxic chemicals.

Dated: September 19, 2002.

Kimberly T. Nelson,

Assistant Administrator, Office of Environmental Information.

BILLING CODE 6560-50-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018-AH94

Endangered and Threatened Wildlife and Plants; Designation of Critical Habitat for Blackburn's Sphinx Moth

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; public hearing announcement.

SUMMARY: The U.S. Fish and Wildlife Service (Service) gives notice of a public hearing on the proposed critical habitat designation for Blackburn's sphinx moth (*Manduca blackburni*). The public hearing on the island of Hawaii and extension of the comment period will allow all interested parties to submit oral or written comments on the proposal. We are seeking comments or suggestions from the public, other concerned agencies, the scientific community, industry, or any other interested parties concerning the proposed rule. Comments already submitted on the proposed rule need not be resubmitted as they will be fully considered in the final determination.

DATES: The comment period for this proposal closes on December 30, 2002. Any comments received by the closing date will be considered in the final decision on this proposal. One public hearing will be held on the island of Hawaii, on Tuesday, October 29, 2002, in Kailua-Kona from 5:30 to 8:30 p.m. Prior to the public hearing, the Service will be available from 3:30 to 4:30 p.m. to provide information and to answer questions.

ADDRESSES: The public hearing in Kailua-Kona will be held at the King Kamehameha Hotel, 75-5660 Palani Road, Kailua-Kona, Hawaii. Comments and materials concerning this proposal should be sent to the Field Supervisor, U.S. Fish and Wildlife Service, Pacific Islands Office, 300 Ala Moana Boulevard, Room 3-122, PO Box 50088, Honolulu, HI 96850. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Paul Henson, at the above address, (telephone 808/541-3441, facsimile 808/541-3470).

SUPPLEMENTARY INFORMATION: The public hearing for the proposed rule to designate critical habitat for Blackburn's sphinx moth announced in this **Federal Register** notice and the public hearing for the proposed designation of critical habitat for 47 plants from the island of Hawaii announced in a separate **Federal Register** notice are scheduled for the same date, time, and location in Kailua-Kona, Hawaii as a matter of convenience to the public. We will accept comments at this public hearing on the proposed designation of critical habitat for Blackburn's sphinx moth, as well as the proposed designation of critical habitat for 47 plants from the island of Hawaii.

Background

On June 13, 2002, we published a proposed critical habitat rule for the Blackburn's sphinx moth (*Manduca blackburni*) listed under the Endangered Species Act of 1973, as amended (Act) (16 U.S.C. 1531 *et. seq.*), known historically from the islands of Hawaii, Kauai, Maui, Molokai, and Oahu, and known currently from the islands of Hawaii, Kahoolawe, and Maui (67 FR 40633). The original comment period closed on August 12, 2002. The comment period now closes on December 30, 2002.

A final listing rule, listing the Blackburn's sphinx moth as endangered, was published in the **Federal Register** on February 1, 2000 (65 FR 4770). In that final rule, we determined that

critical habitat designation for the moth would be prudent, and we also indicated that we were not able to develop a proposed critical habitat designation for the species at that time due to budgetary and workload constraints.

On June 2, 2000, we were ordered by the U.S. District Court for the District of Hawaii (in *Center for Biological Diversity v. Babbitt and Clark*, Civ. No. 99-00603 (D. Haw.)) to publish the final critical habitat designation for Blackburn's sphinx moth by February 1, 2002. The plaintiffs and the Service entered into a consent decree in a separate action agreeing to jointly seek an extension of this deadline (*Center for Biological Diversity v. Norton*, Civ. No. 01-2063 D.D.C. October 2, 2001).

On January 30, 2002, the U.S. District Court in Hawaii approved a joint stipulation to modify the terms of the June 2 order to extend the deadline to August 10, 2002. Subsequently, the Service determined that an additional extension of time was needed to complete this designation making process. On August 21, 2002, the U.S. District Court in Hawaii approved another joint stipulation extending the date for the final rule designating critical habitat for this species to May 30, 2003.

The proposed rule published June 13, 2002, proposes to designate eight separate units, totaling approximately 40,240 hectares (99,433 acres) on the Hawaiian Islands of Maui, Hawaii, Molokai, and Kahoolawe as critical habitat for Blackburn's sphinx moth. For locations of these proposed units, please consult the proposed rule (67 FR 40633).

Section 4(b)(5)(E) of the Act, requires that a public hearing be held if it is requested within 45 days of the publication of a proposed rule. In response to requests from various parties, we will hold a public hearing on the date and at the address described in the **DATES** and **ADDRESSES** sections above. The public hearing and extension of the comment period allows all interested parties to submit oral or written comments on the proposal.

Anyone wishing to make an oral statement for the record is encouraged to provide a written copy of their statement and present it to us at the hearing. In the event there is a large attendance, the time allotted for oral statements may be limited. Oral and written statements receive equal consideration. There are no limits to the length of written comments presented at the hearing or mailed to us. Legal notices announcing the date, time, and location of the public hearing will be

published in newspapers concurrently with the **Federal Register** notice.

Persons needing reasonable accommodations in order to attend and participate in the public hearing should contact Patti Carroll at 503/231-2080 as soon as possible. In order to allow sufficient time to process requests, please call no later than one week before the hearing date. Information regarding this proposal is available in alternative formats upon request.

Comments from the public regarding this proposed rule are sought, especially regarding:

(1) The reasons why any particular area should or should not be designated as critical habitat for this species, as defined by section 3 of the Act;

(2) Specific information on the amount, distribution, and quality of habitat for the species, and what habitat is essential to the conservation of the species and why;

(3) Land use practices and current or planned activities in the subject areas, and their possible impacts on proposed critical habitat;

(4) Any economic or other impacts resulting from the proposed designations of critical habitat, including any impacts on small entities, energy development, low-income households, and local governments;

(5) Economic and other potential values associated with designating critical habitat for the above species such as those derived from non-consumptive uses (e.g., hiking, camping, birding, enhanced watershed protection, increased soil retention, "existence values", and reductions in administrative costs); and

(6) Information for use, under section 4(b)(2) of the Act, in determining if the benefits of excluding an area from critical habitat outweigh the benefits of specifying the area as critical habitat.

The comment period on this proposal closes on December 30, 2002. Written comments should be submitted to the Service office listed in the **ADDRESSES** section.

Author

The primary author of this notice is Mike Richardson (*see ADDRESSES* section).

Authority: The authority for this action is the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*).

Dated: October 1, 2002.

Paul Hoffman,

Acting Assistant Secretary for Fish and Wildlife and Parks.
