information:

Title of Proposal: Owner of Record
and Re-sale Data to Preclude Predatory
Lending Practices (Property Flipping)
on FHA Insured Mortgages.

OMB Control Number, if applicable:
2502-0547.

*Description of the need for the
information and proposed use:* HUD is
committed to preventing predatory sales
practices. To do so, it will not insure
mortgages on properties re-sold within
90 days and will require that only the
owner-of-record be permitted to sell the
property if FHA will insure the
subsequent mortgage. Lenders will be
required to provide evidence of the date
of the last resale and the date it
occurred.

Agency form numbers, if applicable.
None.

*Estimation of the total numbers of
hours needed to prepare the information
collection included number of
respondents, frequency of response, and
hours of response:* The estimated total
number of hours needed to prepare the
information collection is 7,500; the
number of respondents is 750,000
generating approximately 750,000
annual responses; the frequency of
response is on occasion; and the
estimated time needed to prepare the
response is less than 1 minute.

*Status of the proposed information
collection:* Extension of a currently
approved collection.

Authority: The Paperwork Reduction Act
of 1995, 44 U.S.C., Chapter 35, as amended.

Dated: September 3, 2003.

Sean G. Cassidy,

*General Deputy Assistant Secretary for
Housing-Deputy Federal Housing
Commissioner.*

Fish and Wildlife Service

**Notice of Availability of the Final
Revised Recovery Plan for the Gila
Trout (*Oncorhynchus gilae*)**

AGENCY: Fish and Wildlife Service,
Interior.

ACTION: Notice of document availability.

SUMMARY: The U.S. Fish and Wildlife
Service (Service) announces the
availability of the final revised Recovery
Plan for the Gila trout (*Oncorhynchus*

gilae). The Gila trout is native to
relatively undisturbed high altitude
mountain streams in Arizona and New
Mexico. Historically, Gila trout occurred
in the Verde and Agua Fria drainages,
Arizona, and in the upper Gila drainage
in New Mexico. Gila trout may also
have been indigenous to Eagle Creek,
Arizona, and some tributaries of the San
Francisco River, New Mexico. Although
formerly locally abundant, competition
and hybridization with non-native trout,
habitat degradation from improper
livestock grazing and timber harvest
practices, catastrophic forest fires,
drought, and floods caused widespread
declines. Recovery tasks include
establishing additional populations of
Gila trout; protecting existing
populations and habitat; and continuing
to obtain information needed to address
conservation issues.

ADDRESSES: Persons wishing to receive
the Final Revised Recovery Plan can
obtain a copy from the U.S. Fish and
Wildlife Service, New Mexico
Ecological Services Field Office, 2105
Osuna NE., Albuquerque, New Mexico,
87113. The recovery plan will also be
available through the Fish and Wildlife
Region 2 Web site at: [http://
southwest.fws.gov/](http://southwest.fws.gov/).

SUPPLEMENTARY INFORMATION:

Background

Restoring an endangered or
threatened animal or plant to the point
where it is again a secure, self-
sustaining member of its ecosystem is a
primary goal of the Service's
endangered species program. To help
guide the recovery effort, the Service is
working to prepare recovery plans for
most of the listed species native to the
United States. Recovery plans describe
actions considered necessary for
conservation of the species, establish
criteria for downlisting or delisting
them, and estimate time and cost for
implementing the recovery measures
needed.

The Endangered Species Act of 1973
(Act), as amended (16 U.S.C. 1531 *et
seq.*) requires the development of
recovery plans for listed species unless
such a plan would not promote the
conservation of a particular species.
Section 4(f) of the Act, as amended in
1988, requires that public notice and an
opportunity for public review and
comment be provided during recovery
plan development. The draft revised
recovery plan was submitted for

technical and agency review. Information presented during the public comment period has been considered in the preparation of this final recovery plan. We will forward substantive comments regarding recovery plan implementation to appropriate Federal or other entities so that they can take these comments into account during the course of implementing recovery actions.

The Gila trout was listed as endangered on March 11, 1967, under the Federal Endangered Species Preservation Act of 1966. Federal status of the fish as endangered was continued under the Endangered Species Act of 1973. The threats facing the survival and recovery of this species are competition and hybridization with non-native trout species (*e.g.*, *Oncorhynchus mykiss*, *Salmo trutta*), improper forest management practices, improper grazing management practices, severe drought, catastrophic wildfires, and floods.

This recovery plan supersedes the recovery plan finalized for the species in 1993. The plan includes new scientific information about the species gathered since 1993 and provides objectives and actions needed to downlist then delist the species. Recovery activities designed to achieve these objectives include establishing additional populations of Gila trout; protecting existing populations and habitat; continuing to obtain information needed to address conservation issues; and continuing to provide information and coordinating recovery of this species. The recovery plan provides criteria for delisting and reclassification (*i.e.*, from endangered to threatened).

Authority

The authority for this action is Section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: September 3, 2003.

Bryan Arroyo,

Acting Regional Director, Region 2.

[CA-930-5410-00-B178; CACA 44998]

Conveyance of Mineral Interests in California

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of segregation.

SUMMARY: An application has been filed for the conveyance of the Federally owned mineral interest in the tract of land described below in this notice. Publication of this notice temporarily segregates the mineral interests in the public lands covered by the application from appropriation under the mining and mineral leasing laws while the application is being processed.

FOR FURTHER INFORMATION CONTACT:

Kathy Gary, Bureau of Land Management, California State Office, 2800 Cottage Way, Sacramento, California 95825, (916) 978-4677.

SUPPLEMENTARY INFORMATION: The tract of land referred to above in this notice consists of 160 acres of land, situated in Los Angeles County, and is described as follows:

San Bernardino Meridian, California

T. 5 N., R.17 W.,
Sec. 29, S1/2NE1/4;
Sec. 29, N1/2SE1/4

Under certain conditions, section 209(b) of the Federal Land Policy and Management Act of 1976 authorizes the sale and conveyance of the Federally owned mineral interests in land when the non-mineral, or so called "surface" interest in the land is not Federally owned. The objective is to allow consolidation of the surface and mineral interests when either one of the following conditions exist: (1) There are no known mineral values in the land; or (2) where continued Federal ownership of the mineral interests interferes with or precludes appropriate non-mineral development and such development is a more beneficial use of the land than mineral development.

In accordance with section 209(b) of the 1976 Act, on December 10, 2002, an application was filed for the sale and conveyance of the Federally owned mineral interest in the above-described tract of land. Publication of this notice segregates, subject to valid existing rights, the Federally owned mineral interests in the public lands referenced above in this notice from appropriation under the general mining and mineral leasing laws, while the application is being processed to determine if either one of the two specified conditions exists and, if so, to otherwise comply with the procedural requirements of 43 CFR part 2720. The segregative effect shall terminate: (i) Upon issuance of a patent or other document of conveyance as to such mineral interests; (ii) upon final rejection of the application; or (iii) two years from the date of filing the application, whichever occurs first.

Authority: 43 CFR 2720.1-1(b).

Dated: September 2, 2003.

Howard Stark,

Chief, Branch of Lands Management.
