BILLING CODE 4310-55-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Receipt of Applications for Permit

AGENCY: Fish and Wildlife Service,
Interior.

ACTION: Notice of receipt of applications
for permit.

SUMMARY: The public is invited to
comment on the following applications
to conduct certain activities with
endangered species.

DATES: Written data, comments or
requests must be received by October
14, 2003.

ADDRESSES: Documents and other
information submitted with these
applications are available for review,
subject to the requirements of the
Privacy Act and Freedom of Information
Act, by any party who submits a written
request for a copy of such documents
within 30 days of the date of publication
of this notice to: U.S. Fish and Wildlife
Service, Division of Management
Authority, 4401 North Fairfax Drive,
Room 700, Arlington, Virginia 22203;
fax 703/358-2281.

FOR FURTHER INFORMATION CONTACT:
Division of Management Authority,
telephone 703/358-2104.

SUPPLEMENTARY INFORMATION:

Endangered Species

The public is invited to comment on
the following applications for a permit
to conduct certain activities with
endangered species. This notice is
provided pursuant to Section 10(c) of
the Endangered Species Act of 1973, *as
amended* (16 U.S.C. 1531, *et seq.*).
Written data, comments, or requests for
copies of these complete applications
should be submitted to the Director
(address above).

PRT-076575.

Applicant: Gregg V. Severinson, Sidney,
NE.

The applicant requests a permit to
import the sport-hunted trophy of one
male bontebok (*Damaliscus pygargus
dorcas*) culled from a captive herd
maintained under the management
program of the Republic of South Africa,
for the purpose of enhancement of the
survival of the species.

PRT-076616

Applicant: Steven D. Reiley, Grand
Rapids, MI.

The applicant requests a permit to
import the sport-hunted trophy of one
male bontebok (*Damaliscus pygargus
dorcas*) culled from a captive herd
maintained under the management
program of the Republic of South Africa,
for the purpose of enhancement of the
survival of the species.

PRT-076685

Applicant: Lewis E. Misterly, Anaheim
Hills, CA.

The applicant requests a permit to
import the sport-hunted trophy of one
male bontebok (*Damaliscus pygargus
dorcas*) culled from a captive herd
maintained under the management
program of the Republic of South Africa,
for the purpose of enhancement of the
survival of the species.

PRT-695190

Applicant: Western Foundation of
Vertebrate Zoology, Camarillo, CA.

The applicant requests renewal of the
permit to export and re-import non-
living museum specimens of
endangered and threatened species of
plants and animals previously
accessioned into the applicant's
collection for scientific research. This
notification covers activities to be
conducted by the applicant over a five-
year period.

PRT-075484

Applicant: Saint Louis Zoological
Park, St. Louis, MO.

The applicant requests a permit to
import biological samples from
Galapagos hawk (*Buteo galapagoensis*)
located on the Galapagos Islands,
Ecuador, for the purpose of scientific
research. This notification covers
activities to be conducted by the
applicant over a five-year period.

Dated: September 5, 2003.

Monica Farris,

Senior Permit Biologist, Branch of Permits,
Division of Management Authority.

BILLING CODE 4310-55-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Availability of a Safe Harbor Agreement and Receipt of Application for an Enhancement of Survival Permit for Activities on the (Crosswhite) EC Bar Ranch, Apache County, AZ

AGENCY: Fish and Wildlife Service,
Interior.

ACTION: Notice of availability and 30-day
public comment period.

SUMMARY: James W. Crosswhite
(Applicant) has applied to the U.S. Fish
and Wildlife Service (Service) for an
enhancement of survival permit
pursuant to section 10(a)(1)(A) of the
Endangered Species Act (Act). The
permit application includes a proposed
Safe Harbor Agreement between the
Applicant and the Service. The
Applicant has been assigned permit
number TE-075891-0. The proposed
Agreement and permit would become
effective upon signature of the
Agreement and both would remain in
effect for 50 years. The requested permit
would authorize take of two federally
listed species—the endangered
southwestern willow flycatcher
(*Empidonax traillii extimus*) and the
threatened Little Colorado River
spinedace (*Lepidomeda vittata*). The
proposed take could occur as a result of
conservation measures implemented on
2.5 miles of Nutrioso Creek in Apache
County, Arizona.

Based upon guidance in the Service's
June 17, 1999, Final Safe Harbor Policy,
if a Safe Harbor Agreement and
associated permit are not expected to
individually or cumulatively have a
significant impact on the quality of the
human environment or other natural
resources, the Agreement/permit may be
categorically excluded from undergoing
National Environmental Policy Act
(NEPA) review. We have made a
preliminary determination that the
proposed Agreement and permit
application qualify as a "Low Effect"

agreement, thus, these actions are eligible for categorical exclusion under NEPA. The "Low Effect" determination is available for review.

DATES: Written comments on the application should be received by October 14, 2003.

ADDRESSES: Persons wishing to review the application may obtain a copy by writing to the Regional Director, U.S. Fish and Wildlife Service, PO Box 1306, Room 4102, Albuquerque, New Mexico 87103. Persons wishing to review the Agreement may obtain a copy by writing to the Field Supervisor, Arizona Ecological Services Field Office, 2321 West Royal Palm Road, Suite 103, Phoenix, Arizona 85021-4951, (602) 242-0210. Documents relating to the application will be available for public inspection by written request, by appointment only, during normal business hours (8 a.m. to 4:30 p.m.) at the U.S. Fish and Wildlife Service, Arizona Ecological Services Field Office, Phoenix, Arizona.

Written data or comments concerning the application and Agreement should be submitted to the Field Supervisor, U.S. Fish and Wildlife Service, Arizona Ecological Services Field Office, 2321 West Royal Palm Road, Suite 103, Phoenix, Arizona 85021-4951. Please refer to permit number TE-075891-0 when submitting comments.

FOR FURTHER INFORMATION CONTACT: Field Supervisor at the U.S. Fish and Wildlife Service, Arizona Ecological Services Field Office, 2321 West Royal Palm Road, Suite 103, Phoenix, Arizona 85021-4951 (602) 242-0210.

SUPPLEMENTARY INFORMATION:

Background

Under a Safe Harbor Agreement, participating property owners voluntarily undertake management activities on their property to enhance, restore, or maintain habitat benefitting species listed under the Act. Safe Harbor Agreements encourage private and other non-Federal property owners to implement conservation efforts for listed species by assuring property owners they will not be subject to increased property use restrictions if their efforts attract listed species to their property or increase the numbers or distribution of listed species already on their property. Application requirements and issuance criteria for enhancement of survival permits through Safe Harbor Agreements are found in 50 CFR 17.22(c).

James W. Crosswhite, owner of the 394-acre EC Bar Ranch, plans to implement conservation measures on 2.5 miles of Nutrioso Creek, located one

mile north of Nutrioso, in Apache County, Arizona. The conservation measures will improve riverine, riparian, and upland habitat through establishment of native riparian vegetation. These measures have been shown to be effective in improving water quality, reducing sedimentation, and increasing stream bank stability. The measures that will be implemented include: planting 10,000 to 21,000 riparian trees, harvesting of cuttings of riparian vegetation in two to four years, planting of grasses and shrubs along the flood plain terrace, and repairing old and installing new livestock and elk fence enclosures.

The Agreement is expected to provide a net conservation benefit for two federally listed species; the southwestern willow flycatcher and the Little Colorado spinedace. The baseline condition for the southwestern willow flycatcher is zero. This is because there is currently no habitat for this species in the project area. The Safe Harbor Policy states that the baseline can be described using measurements of available suitable habitat components. Because data from fish surveys can vary due to the monitoring methods used as well as fluctuations in natural conditions, actual population levels will not be used to quantify baseline conditions for the Little Colorado spinedace. Instead, the baseline conditions will use the number of woody riparian trees that are three feet or greater in height that are present either as individuals or as clumps along the 2.5 miles of Nutrioso Creek on the EC Bar Ranch at the signing of this Agreement. Currently there are approximately 100 individual or clumps of woody riparian trees consisting of coyote willow, shiny willow, strapleaf willow, narrowleaf cottonwood, and thin-leaved alder in the project area that are three feet or greater in height.

The Agreement will provide protection to the Applicant against further regulation under the Endangered Species Act in the event that any of the covered species should be taken on his land as a result of implementation of the proposed conservation measures.

The Service will evaluate the permit application, associated documents, and comments submitted to determine whether the permit application meets the issuance criteria of 50 CFR 17. If, upon completion of the 30-day comment period, the Service determines that the criteria are met, the Service will sign the Agreement and issue an enhancement of survival permit under section 10 (a)(1)(A) of the Act to James W. Crosswhite for take of southwestern willow flycatcher and Little Colorado

spinedace incidental to otherwise lawful activities in accordance with the terms of the Agreement.

Section 9 of the Act prohibits the "taking" of threatened or endangered species. However, the Service, under limited circumstances, may issue permits to take threatened and endangered wildlife species incidental to, and not the purpose of, otherwise lawful activities. Regulations governing permits for endangered species are at 50 CFR 17.22 and 50 CFR 17.32 for threatened species.

This notice is provided pursuant to section 10(c) of the Act and National Environmental Policy Act regulations (40 CFR 1506.6).

Bryan Arroyo,

Acting Regional Director, Southwest Region, Albuquerque, New Mexico.

BILLING CODE 4510-55-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Intent To Prepare an Environmental Impact Statement (EIS) and Notice of a Public Scoping Meeting Related to the Pima County Multi-Species Conservation Plan To Be Held on October 4, 2003

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of Intent to prepare an EIS and notice of a public scoping meeting.

SUMMARY: Pursuant to the National Environmental Policy Act (NEPA), this notice advises the public that the U.S. Fish and Wildlife Service (Service) intends to prepare an EIS to evaluate the impacts of and alternatives for the possible issuance of an incidental take permit, pursuant to section 10(a)(1)(B) of the Endangered Species Act of 1973, as amended (Act), to Pima County. Pima County is preparing to apply for an incidental take permit through development and implementation of the Pima County Multi-Species Conservation Plan (MSCP), which will serve as a habitat conservation plan, as required by the Act, for issuance of an incidental take permit. The Pima County MSCP will include measures necessary to minimize and mitigate the effects of the proposed taking of listed and sensitive species and their habitats.

Date of Scoping Meeting: A public scoping meeting will be held on October 4, 2003, at 10 a.m. at the Pima County Public Works.
