DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Privacy Act as Amended; Amendment of an Existing System of Records

AGENCY: U.S. Fish and Wildlife Service, Department of the Interior.

ACTION: Proposed amendment of an existing system of records notice.

SUMMARY: Pursuant to the provisions of the Privacy Act of 1974, as amended (5 U.S.C. 552a), the Department of the Interior issues this public notice of its intent to modify an existing Privacy Act system of records managed by the U.S. Fish and Wildlife Service (FWS). The changes are to the system of records called "Real Property Records—Interior, FWS-11" which is published in its entirety below.

DATES: 5 U.S.C. 552a (e)(11) requires that the public be provided a 30-day period in which to comment on an agency's intended use of the information in the system of records. The Office of Management and Budget in its Circular A-130, requires an additional 10-day period in which to make these comments. Comments received within the 40 days from the publication in the **Federal Register** will be considered. The system will be effective as proposed at the end of the comment period unless comments are received which would require a contrary determination. The Department will publish a revised notice if changes are made based upon a review of comments received. Any person

interested in commenting on this proposed amendment may do so by submitting comments in writing to Mr. Johnny R. Hunt, Privacy Act Officer, U.S. Fish and Wildlife Service, Department of the Interior, Mail Stop 222, Arlington square Building, 4401 North Fairfax Drive, Arlington, Virginia 22203, or by e-mail to Johnny_Hunt@fws.gov.

FOR FURTHER INFORMATION CONTACT: Mr. Johnny R. Hunt, Privacy Act Officer, U.S. Fish and Wildlife Service, *telephone:* (703) 358-1730, or *fax:* (703) 358-2269.

SUPPLEMENTARY INFORMATION: The Refuge Revenue Sharing Act of October 17, 1978, Public Law 95-469, amended the Act of June 15, 1935 [amended by the Act of August 30, 1964 (78 Stat. 701; 16 U.S.C. 715s)] authorizes the Department of Interior to deposit into the United States Treasury revenues received by the Secretary of Interior from such activities as the "sale or other disposition of animals, salmonoid carcasses, timber, hay, grass, or other products of the soil, minerals, shells, sand, or gravel, from other privileges, or from leases for public accommodations or facilities * * *". The Department applies such revenues toward the maintenance of the National Wildlife Refuge system.

Monies from the Migratory Bird Conservation Fund and other Congressional Appropriation provide for such activities as land appraisals, surveys, and payments for acquisition of real property interests. The FWS established a subcomponent of the Real Property Records system called the Land Acquisition Network Database System (LANDS) to reconcile end-of-year transaction reports required by the Internal Revenue Service (IRS) for payments made to landowners who are selling an interest to FWS. The system will also allow the program to more quickly obtain land transaction status related to individual property parcels. Because the system will retrieve personal information such as name, address, social security number, land ownership status, and records of payment that must be reported as income to the IRS, it is subject to the Privacy Act of 1974 (5 U.S.C. 552a).

Johnny R. Hunt,
Privacy Act Officer, U.S. Fish & Wildlife Service.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

We maintain records both in paper and electronic files. Electronic records are stored in a computer system on a secure server. Hardcopy input records associated with reconciliation of bureau financial reports or records required to report taxable income are temporarily secured in a locked file that bears a Privacy Act warning label.

RETRIEVABILITY:

Generally we store the records by individual name, project name, project number and location. Electronic records may be searched on or reported by any data field. Retrieval is generally dependent upon the report or purpose of usage and whether a need to know exists. For example, records may be retrieved by social security number, name, tract number, State, or county. Records are retrievable for several purposes, such as determining landowner payments that need to be reported to IRS, tracking payments made to landowners, reconciliation of the bureau's financial reports, and tracking status of acquisition activities or requests for surveys and appraisals related to those activities.

SAFEGUARDS:

We maintain the records in accordance with safeguards specified in the Department of the Interior Privacy Act regulations (43 CFR 2.51). Safeguards include password-protected computers and on site locked storage rooms. Electronic records have a multi-level password-protected database. The file server uses active directory for logon. The application uses secure socket layer (SSL) through port 443 so that HTTP traffic is encrypted with 128-bit encryption for external protection. Therefore, data is secure between the client and the Branch of Communication Technology's Server. The tax identification number, Social Security Number and Employee Identification Number are encrypted using base 64 encryption algorithms and

converted to HEX. Electronic records are password-protected, backed up daily, and maintained with safeguards meeting the security requirements of 43 CFR 2.51. A Privacy Impact Assessment was completed to ensure that Privacy Act requirements and safeguard requirements are met.

RETENTION AND DISPOSAL:

Records are maintained in accordance with U.S. Fish and Wildlife Service Records Schedule and the General Records Schedule (GRS-7).
