

7. Cost

No further comments on this descriptor except to reiterate that cost considerations play into several of the other descriptors.

8. Motivational Issues Affecting Implementation

We suggest that consideration be given to examining what further motivational issues may impact whether the programs are implemented and sustained with fidelity. These include: appeal of materials and activities for the population to be served, appeal of materials and activities for the staff who will implement the programs, support of the program for the preexisting goals and programs of the site (e.g., school-based programs that support academics), how well the program otherwise integrates with existing goals, programs, and activities of the site (e.g., teachers are expected to direct student discussions, but not therapy), support offered for adapting the program to specific local populations, fit of materials to the typical structures of the setting (e.g., short enough lessons to fit within a class period, necessary equipment is usually available in the setting).

SUPPLEMENTARY INFORMATION:

Background

A Conservation Agreement is an effective, proactive way to address conservation of species that have not yet been listed under the Endangered Species Act but that face identifiable risks. Early conservation actions preserve management options, minimize the cost of recovery, and reduce the potential for restrictive land use policies in the future. Addressing the needs of

species before the regulatory restrictions associated with listed species come into play often allows greater management flexibility to stabilize or restore these species and their habitats. In addition, as threats are reduced and populations are increased or stabilized, priority for listing can be shifted to those species in greatest need of the Endangered Species Act's protective measures. Ideally, sufficient threats can be removed to eliminate the need for listing.

There are an estimated 16,000 yellow-billed loons worldwide. Approximately 3,300 breed in the freshwater treeless tundra of Alaska. They breed abundantly on the North Slope, and sparsely in western Alaska, primarily north of Unalakleet and the foothills of the Brooks Range. Yellow-billed loons nest exclusively in coastal and inland low-lying tundra from 62-74° N latitude, in association with permanent, fish-bearing lakes. Populations are thought to be limited primarily by breeding habitat, specifically nesting and brood-rearing lakes (North 1994). Lakes that support breeding loons have abundant fish populations; depths greater than 2 meters (m) (6.5 feet) and water under the ice during winter; large areas; connections to streams which may supply fish; highly convoluted, vegetated, and low-lying shorelines; and clear water and dependable water. Breeding lakes may be near but not connected to major rivers, possibly because fluctuating river water levels can flood nests or cause turbidity that compromises foraging success.

In northern Alaska, yellow-billed loons breed on lands within the National Petroleum Reserve-Alaska (NPR-A) and on State of Alaska lands between the Colville and the Canning Rivers. In western Alaska, yellow-billed loons are found breeding primarily along the coastal fringe of the Seward Peninsula on Selawik National Wildlife Refuge (NWR), administered by the U.S. Fish and Wildlife Service (USFWS); Cape Krusenstern National Monument and Bering Land Bridge National Preserve, administered by the National Park Service (NPS); and on scattered small parcels of Bureau of Land Management (BLM) and Alaska Native-owned lands. Small numbers of yellow-billed loons have also been found nesting on Alaska Native-owned lands on St. Lawrence Island.

The goal of this Agreement is to protect yellow-billed loons and their breeding, brood-rearing, and migrating habitats in Alaska, such that current or potential threats in these areas are avoided, eliminated or reduced to the degree that the species will not become

threatened or endangered from these threats within the foreseeable future.

The parties entering into this conservation agreement are the Alaska Department of Fish and Game, the Alaska Department of Natural Resources, and the U.S. Department of the Interior (U.S. Fish and Wildlife Service; Bureau of Land Management; and National Park Service). This Agreement identifies agency commitments to implement specific actions to protect yellow-billed loons and their habitats from potential impacts of land uses and management activities, to inventory and monitor yellow-billed loon populations, to investigate and reduce the impact of subsistence activities (harvest and fisheries bycatch), and to conduct related biological research. We do not expect any concrete effects to the private sector from the conservation measures in the agreement. The term of the agreement is 10 years.

We will consider all information received during the public comment period on this conservation agreement. Substantive technical comments may result in changes to the conservation agreement. Substantive comments regarding conservation agreement implementation may not necessarily result in changes to the Agreement, but will be forwarded to the appropriate Federal agency or other entities so that they can take these comments into account during the course of implementing Agreement actions. Individual responses to comments will not be provided.

Public Comments Solicited

Our practice is to make comments, including names and home addresses of respondents, available for public review during regular business hours. Individual respondents may request that we withhold their home address, which we will honor to the extent allowable by law. If you wish us to withhold your name or address, you must state this request prominently at the beginning of your comments. However, we will not consider anonymous comments. To the extent consistent with applicable law, we will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public inspection in their entirety.

Authority

The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: February 24, 2006.

Gary Edwards,

Acting Regional Director, Region 7, U.S. Fish and Wildlife Service.

Non-Competitive Sale of Public Lands, OR 62305

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action.

SUMMARY: A 40.24 acre parcel in Lake County, Oregon is being considered for direct (non-competitive) sale to Mr. Alan Withers. Mr. Withers, the adjoining landowner, has used the subject parcel for hay storage and livestock feedlot purposes, authorized under a range improvement permit, since 1989. No significant resource values will be affected by this disposal. The parcel proposed for sale is identified as suitable for disposal in the Lakeview Resource Management Plan and Record of Decision, dated November 2003.

DATES: All comments must be received in writing by the BLM on or before April 28, 2006.

ADDRESSES: Address all written comments concerning this notice Thomas E. Rasmussen, BLM, Lakeview Resource Area Manager, 1301 South G Street, Lakeview, Oregon 97630. Electronic format submittals will not be accepted.

FOR FURTHER INFORMATION CONTACT: Dan Stewardson, Realty Specialist, at the above address or phone (541) 947-6115.

SUPPLEMENTARY INFORMATION: The following described public land is suitable for sale under section 203 of the Federal Land Policy and Management Act of 1976, (90 Stat. 2750, 43 U.S.C. 1713).

Willamette Meridian, Oregon

T. 33S., R. 18E., section 7, lot 1.

The area described contains 40.24 acres, more or less. This parcel will be sold at no less than the appraised market value, which has been determined to be \$4,000.00.

In accordance with 43 CFR 2711.3-3(a)(3) & (4), direct sale procedures may be utilized when there is a need to recognize an authorized use such as an existing business which could suffer a substantial economic loss if the parcel were purchased by other than the authorized user. The offered public land is an integral part of Mr. Withers livestock operation and due to its location impractical for another party to own.

Mr. Withers will be allowed 30 days from receipt of a written offer to submit

a deposit of at least 20 percent of the appraised value of the parcel, and within 180 days thereafter submit the balance. If the balance of the purchase price is not received within the 180 days, the deposit shall be forfeited to the United States and the parcel withdrawn from sale.

The following rights, reservations and conditions will be included in the conveyance document to the land:

(1) The sale involves the surface estate of the parcel only.

(2) A reservation to the United States for a right-of-way for ditches and canals constructed by the authority of the United States, Act of August 30, 1890 (43 U.S.C. 945).

(3) The sale parcel will be subject to all valid existing rights of record at the time of conveyance.

(4) A notice and indemnification statement under the Comprehensive Environmental Response, Compensation and Liability Act (42 U.S.C. 9620) holding the United States harmless from any release of hazardous materials that may have occurred as a result of any authorized or unauthorized use of the property by other parties.

The lands described herein are hereby segregated from appropriation under the public land laws, including the mining laws, pending disposition of this action or 270 days from the date of publication of this notice, whichever occurs first.

Public Comments

Detailed information concerning the sale, including the reservations, sale procedures and conditions, appraisal, planning and environmental documentation, is available for review at the Lakeview Resource Area Office, 1301 South G Street, Lakeview, Oregon 97630.

In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

Comments, including names, street addresses and other contact information of respondents, will be available for public review. Individual respondents may request confidentiality. If you wish to request that BLM consider withholding your name, street address and other contact information (such as: FAX or phone number) from public review or from disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your comment. BLM will honor requests for confidentiality on a case-by-case basis to the extent allowed by law. BLM will make available for public inspection in their entirety all submissions from organizations or businesses and from individuals
