SUPPLEMENTARY INFORMATION: With this notice, we finalize the CCP process for Farallon NWR. We announce our decision and the availability of the FONSI for the final CCP for Farallon in accordance with National Environmental Policy Act (NEPA) (40 CFR 1506.6(b)) requirements. We completed a thorough analysis of impacts on the human environment, which we included in the EA that accompanied the draft CCP.

The Refuge is located off the coast of San Francisco and is within San Francisco County. The 211-acre Refuge consists of four island groupings that were first designated as a Refuge in 1909, "as a preserve and breeding ground for native birds" (Executive Order 1043, Feb. 27, 1909). The Refuge supports the largest seabird breeding colony in the contiguous United States and provides wintering and nesting habitat for migratory seabirds and pinnipeds. In 1974, Congress enacted Public Law 93-550, which designated all the islands except for Southeast Island as the Farallon Wilderness, totaling 141 acres.

We made the Draft CCP and Environmental Assessment (Draft CCP/EA) available for a 112-day public review and comment period, which we announced via several methods, including press releases, updates to constituents, and a **Federal Register** notice (73 FR 78386, December 22, 2008). The Draft CCP/EA identified and evaluated four alternatives for managing the Refuge for the next 15 years. Alternative A was the no-action alternative, which described current Refuge management activities. Alternative B placed greater emphasis on wildlife monitoring and research, habitat restoration, eradication of nonnative species, and off-refuge outreach and education. Alternative C, which was identified as the preferred
