

MMS 2007–018) (Multisale EIS), completed in April 2007. This Final Supplemental EIS also updated the environmental and socioeconomic analyses for WPA Lease Sale 218 in the GOM OCS Oil and Gas Lease Sales: 2009–2012; CPA Sales 208, 213, 216, and 222; WPA Sales 210, 215, and 218; Final Supplemental EIS (OCS EIS/EA MMS 2008–041) (2009–2012 Supplemental EIS), completed in September 2008.

SUPPLEMENTARY INFORMATION: BOEMRE developed the Final Supplemental EIS for WPA Lease Sale 218 in order to consider new circumstances and information arising from, among other things, the *Deepwater Horizon* event and spill. This Final Supplemental EIS provides updates on the baseline conditions and potential environmental effects of oil and natural gas leasing, exploration, development, and production in the WPA. BOEMRE conducted an extensive search for new information made available since completion of the Multisale EIS and the 2009–2012 Supplemental EIS and in consideration of the *Deepwater Horizon* event, including scientific journals; interviews with personnel from academic institutions and Federal, State, and local agencies; and available scientific data and information from academic institutions and Federal, State, and local agencies. BOEMRE has reexamined potential impacts of routine activities and accidental events, including a possible large-scale event, associated with the proposed WPA lease sale and the proposed lease sale's incremental contribution to the cumulative impacts on environmental and socioeconomic resources. Like the Multisale EIS and the 2009–2012 Supplemental EIS, the oil and gas resource estimates and scenario information for this Final Supplemental EIS are presented as ranges that would likely be involved as a result of this proposed lease sale.
