The ICR concerns the paperwork requirements for the *USA National Phenology Network—The Nature's Notebook Plant and Animal Observing Program*. As required by the Paperwork Reduction Act (PRA) of 1995, and as part of our continuing efforts to reduce paperwork and respondent burden, we invite the general public and other Federal agencies to take this opportunity to comment on this ICR. This collection is scheduled to expire on January 31, 2013.

DATES: Submit written comments by January 3, 2013.

ADDRESSES: Please submit comments on this information collection directly to the Office of Management and Budget (OMB), Office of Information and Regulatory Affairs, Attention: Desk Officer for the Department of the Interior via email:

SUPPLEMENTARY INFORMATION:

Title: USA National Phenology Network—The *Nature's Notebook* Plant and Animal Observing Program.

OMB Control Number: 1028-0103.

Type of Request: Notice of an extension of a currently approved information collection.

Respondent Obligation: Voluntary.

Abstract: The USA-NPN is a program sponsored by the USGS that uses standardized forms for tracking plant and animal activity as part of a project called *Nature's Notebook*. The *Nature's Notebook* forms are used to record phenology (e.g., timing of leafing or flowering of plants and reproduction or migration of animals) as part of a nationwide effort to understand and predict how plants and animals respond to environmental variation and changes in weather and climate. Contemporary data collected through *Nature's Notebook* are quality-checked, described and made publicly available; data are used to inform decision-making in a variety of contexts, including

agriculture, drought monitoring, and wildfire risk assessment. Phenological information is also critical for the management of wildlife, invasive species, and agricultural pests, and for understanding and managing risks to human health and welfare, including allergies, asthma, and vector-borne diseases. Participants may contribute phenology information to *Nature's Notebook* through a browser-based web application or via mobile applications for iPhone and Android operating systems, meeting GPEA requirements. The web application interface consists of several components: user registration, a searchable list of 877 plant and animal species which can be observed; a "profile" for each species that contains information about the species including its description and the appropriate monitoring protocols; a series of interfaces for registering as an observer, registering a site, registering plants and animals at a site, generating datasheets to take to the field, and a data entry page that mimics the datasheets.

Frequency of Collection: On occasion. During the Spring and Fall seasons when phenology is changing quickly, we recommend respondents make observations twice per week.

Estimated Number and Description of Respondents: In addition to those users already registered, we expect an additional 1,027 users will register each year. These respondents are members of the public, registered with *Nature's Notebook*.

Estimated Annual Responses: 501,130.

Estimated Annual burden hours: 17,032.

Estimated Reporting and Recordkeeping "Non-Hour Cost"

Burden: We estimate the non-hour cost burden to be \$3.34 per respondent. This cost applies to new observers and includes material used to mark sites or plants during the first observation. Marking helps to ensure reporting consistency for future observations.

Public Disclosure Statement: The PRA (44 U.S.C. 3501, *et seq.*) provides that an agency may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number.

Comments: To comply with the public consultation process, on August 10, 2012, we published a **Federal Register** notice (77 FR 47867) announcing that we would submit this ICR to OMB for approval. The notice provided the required 60-day public comment period, which ended October 9, 2012. In response to our **Federal Register** Notice, we received one
