Proposed Information Collection; Horseshoe Crab Tagging Program

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice; request for comments.

SUMMARY: We (U.S. Fish and Wildlife Service) will ask the Office of Management and Budget (OMB) to approve the information collection (IC) described below. As required by the Paperwork Reduction Act of 1995 and as part of our continuing efforts to reduce paperwork and respondent burden, we invite the general public and other Federal agencies to take this opportunity to comment on this IC. This IC is scheduled to expire on May 31, 2015. We may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: To ensure that we are able to consider your comments on this IC, we must receive them by April 13, 2015.

ADDRESSES: Send your comments on the IC to the Information Collection Clearance Officer, U.S. Fish and Wildlife Service, MS BPHC, 5275 Leesburg Pike, Falls Church, VA 22041-3803 (mail); or hope_grey@fws.gov (email). Please include "1018-0127" in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this IC, contact Hope Grey at hope_grey@fws.gov (email) or 703-358-2482 (telephone).

SUPPLEMENTARY INFORMATION:

I. Abstract

Horseshoe crabs play a vital role commercially, biomedically, and ecologically along the Atlantic coast. Horseshoe crabs are commercially harvested and used as bait in eel and conch fisheries. Biomedical companies along the coast also collect and bleed horseshoe crabs at their facilities. *Limulus* Amoebocyte Lysate is derived from crab blood, which has no synthetic substitute, and is used by pharmaceutical companies to test sterility of products. Finally, migratory shorebirds also depend on the eggs of horseshoe crabs to refuel on their migrations from South America to the Arctic. One bird in particular, the red knot, feeds primarily on horseshoe crab eggs during its stopover. Effective

January 12, 2015, this species was listed as threatened under the Endangered Species Act.

In 1998, the Atlantic States Marine Fisheries Commission (ASMFC), a management organization with representatives from each State on the Atlantic Coast, developed a horseshoe crab management plan. The ASMFC plan and its subsequent addenda established mandatory State-by-State harvest quotas, and created the 1,500-square-mile Carl N. Shuster, Jr., Horseshoe Crab Sanctuary off the mouth of Delaware Bay.

Restrictive measures have been taken in recent years, but populations are increasing slowly. Because horseshoe crabs do not breed until they are 9 years or older, it may take some time before the population measurably increases. Federal and State agencies, universities, and biomedical companies participate in a Horseshoe Crab Cooperative Tagging Program. The Maryland Fishery Resources Office, U.S. Fish and Wildlife Service, maintains the information that we collect under this program and uses it to evaluate migratory patterns, survival, and abundance of horseshoe crabs.

Agencies that tag and release the crabs complete FWS Form 3-2311 (Horseshoe Crab Tagging) and provide the Service with:

- Organization name.
- Contact person name.
- Tag number.
- Sex of crab.
- Prosomal width.
- Capture site, latitude, longitude, waterbody, State, and date.

Members of the public who recover tagged crabs provide the following information using FWS Form 3-2310 (Horseshoe Crab Recapture Report):

- Tag number.
- Whether or not tag was removed.
- Whether the tag was circular or square.
- Condition of crab.
- Date captured/found.
- Crab fate.
- Finder type.
- Capture method.
- Capture location.
- Reporter information.
- Comments.

If the public participant who reports the tagged crab requests information, we send data pertaining to the tagging program and tag and release information on the horseshoe crab that was found or captured.

I. Data

OMB Control Number: 1018-0127.
Title: Horseshoe Crab Tagging Program.

Service Form Number(s): 3–2310 and 3–2311.
Type of Request: Extension of currently approved collection.

Description of Respondents: Tagging agencies include Federal and State agencies, universities, and biomedical companies. Members of the general public provide recapture information.

Respondent's Obligation: Voluntary.
Frequency of Collection: On occasion when horseshoe crabs are tagged and when horseshoe crabs are found or captured.

Activity	Number of annual respondents	Number of annual responses	Completion time per response	Annual burden hours
FWS Form 3–2310	1,160	2,750	5 minutes	229
FWS Form 3–2311	18	18	95 hours*	1,710
Totals	1,178	2,768	1,939

* Average time required per response is dependent on the number of tags applied by an agency in 1 year. Agencies tag between 25 and 9,000 horseshoe crabs annually, taking between 2 to 5 minutes per crab to tag, record, and report data. Each agency determines the number of tags it will apply.

Estimated Annual Nonhour Burden Cost: None.

III. Comments

We invite comments concerning this information collection on:

- Whether or not the collection of information is necessary, including whether or not the information will have practical utility;
- The accuracy of our estimate of the burden for this collection of information;
- Ways to enhance the quality, utility, and clarity of the information to be collected; and
- Ways to minimize the burden of the collection of information on respondents.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this IC. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: February 4, 2015.

Tina A. Campbell,

Chief, Division of Policy, Performance, and Management Programs, U.S. Fish and Wildlife Service.

John H. Chafee Coastal Barrier Resources System; Collier County, FL; Availability of Draft Maps and Request for Comments

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce the availability of three John H. Chafee Coastal Barrier Resources System (CBRS) draft revised maps for public review and comment. The draft maps, all dated November 10, 2014, are for three existing CBRS units and two proposed new CBRS units located in Collier County, Florida.

DATES: To ensure consideration, we must receive your written comments by March 27, 2015.

ADDRESSES: Mail or hand-deliver (during normal business hours) comments to Katie Niemi, Coastal Barriers Coordinator, Division of Budget and Technical Support, U.S. Fish and Wildlife Service, 5275 Leesburg Pike, MS: ES, Falls Church, VA 22041, or send comments by electronic mail (email) to CBRAcomments@fws.gov.

FOR FURTHER INFORMATION CONTACT: Katie Niemi, Coastal Barriers Coordinator, (703) 358–2071 (telephone); or CBRA@fws.gov (email).

SUPPLEMENTARY INFORMATION:

Background

Coastal barriers are typically elongated, narrow landforms located at the interface of land and sea, and are inherently dynamic ecosystems. Coastal barriers provide important habitat for fish and wildlife, and serve as the

mainland’s first line of defense against the impacts of severe storms. With the passage of the Coastal Barrier Resources Act (CBRA) in 1982 (Pub. L. 97–348), Congress recognized that certain actions and programs of the Federal Government have historically subsidized and encouraged development on coastal barriers, where severe storms are much more likely to occur, and the result has been the loss of natural resources; threats to human life, health, and property; and the expenditure of millions of tax dollars each year.

The CBRA established the CBRS, which comprised 186 geographic units encompassing approximately 453,000 acres of undeveloped lands and associated aquatic habitat along the Atlantic and Gulf of Mexico coasts. The CBRS was expanded by the Coastal Barrier Improvement Act of 1990 (Pub. L. 101–591) to include additional areas along the Atlantic and Gulf of Mexico coasts, as well as areas along the coasts of the Great Lakes, the U.S. Virgin Islands, and Puerto Rico. The CBRS now comprises a total of 856 geographic units, encompassing approximately 3.2 million acres of relatively undeveloped coastal barrier lands and associated aquatic habitat. These areas are depicted on a series of maps entitled “John H. Chafee Coastal Barrier Resources System.”

Most new Federal expenditures and financial assistance that would have the effect of encouraging development are prohibited within the CBRS. However, development can still occur within the CBRS, provided that private developers or other non-Federal parties bear the full cost, rather than the American taxpayers.

The CBRS includes two types of units, System units and Otherwise Protected Areas (OPAs). System units generally comprise private lands that were relatively undeveloped at the time of their designation within the CBRS. Most
