The applicant anticipates taking about 1.91 acres of feeding, breeding, and sheltering habitat used by the Florida scrub-jay (*Aphelocoma coerulescens*) (scrub-jay) incidental to land preparation and construction in Charlotte County, Florida. The applicant's HCP describes proposed minimization measures and completed mitigation measures to address the effects of development on the covered species.

**DATES:** We must receive your written comments on the ITP application and HCP on or before July 23, 2015.

**Applicant's Proposed Project**

We received an application from the applicant for renewal of an incidental take permit. The applicant requests a 5-year renewal of an ITP under section 10(a)(1)(B) of the Act (16 U.S.C. 1531 *et seq.*). If we approve the renewal, the applicant anticipates taking a total of approximately 1.91 acres of scrub-jay breeding, feeding, and sheltering habitat, incidental to land preparation and construction in Section 9, Township 40S, Range 23E, Charlotte County, Florida. The applicant currently has neither a time frame for development, nor a specific site plan; however, development of this parcel would likely include construction of one or more structures, a parking area, and installation of associated utilities.

The applicant proposes to minimize impacts to scrub-jays by: (1) Using scrub oaks and other native plants in post-construction landscaping; (2) avoiding land clearing activities during the scrub-jay nesting season (March 1 to June 30); (3) avoiding planting trees that will be

30 feet in height or more when mature because they can be used as perches by predatory birds; and (4) refraining from keeping or feeding free-roaming cats. Mitigation for unavoidable impacts has been accomplished by the donation of 4.3 acres of suitable habitat to Charlotte County for scrub-jay conservation. The Service listed the scrub-jay as threatened in 1987 (June 3, 1987; 52 FR 20715), effective July 6, 1987.

**Our Preliminary Determination**

The Service has made a preliminary determination that the applicant's project, including the mitigation measures, will individually and cumulatively have a minor or negligible effect on the species covered in the HCP. Therefore, renewal of the ITP is a "low-effect" action and qualifies as a categorical exclusion under the National Environmental Policy Act (NEPA) (40 CFR 1506.6), as provided by the Department of the Interior Manual (516 DM 2 Appendix 1 and 516 DM 6 Appendix 1). We base our preliminary determination that issuance of the ITP qualifies as a low-effect action on the following three criteria: (1) Implementation of the project would result in minor or negligible effects on federally listed, proposed, and candidate species and their habitats; (2) Implementation of the project would result in minor or negligible effects on other environmental values or resources; and (3) Impacts of the project, considered together with the impacts of other past, present, and reasonably foreseeable similarly situated projects, would not result, over time, in cumulative effects to environmental values or resources that would be considered significant. This preliminary determination may be revised based on our review of public comments that we receive in response to this notice.

**Next Steps**

The Service will evaluate the HCP and comments submitted thereon to determine whether the application meets the requirements of section 10(a) of the Act. The Service will also evaluate whether issuance of the section 10(a)(1)(B) ITP complies with section 7 of the Act by conducting an intra-Service section 7 consultation. The results of this consultation, in combination with the above findings, will be used in the final analysis to determine whether or not to renew the ITP. If it is determined that the requirements of the Act are met, the ITP will be renewed.

**Authority:** We provide this notice under Section 10 of the Endangered Species Act (16

U.S.C. 1531 *et seq.*) and NEPA regulations (40 CFR 1506.6).

Dated: June 16, 2015.
