Needs and Uses: On November 20, 2015, in document FCC 15-156, the Commission released a *Second Report and Order, Order on Reconsideration, and Further Notice of Proposed Rulemaking*, MB Docket No. 12-108, FCC 15-156, adopting additional rules implementing Sections 204 and 205 of the Twenty-First Century Communications and Video Accessibility Act of 2010 (CVAA) related to accessible user interfaces and video programming guides and menus. These rules are codified at 47 CFR 79.107 and 79.108. First, the *Second Report and Order* implements Section 204's requirement that both the "appropriate built-in apparatus functions" and the "on-screen text

menus or other visual indicators built in to the digital apparatus" to access such functions be "usable by individuals who are blind or visually impaired" by relying on the existing definition of "usable" in Section 6.3(l) of the Commission's rules. The 6.3(l) definition of "usable" requires that "individuals with disabilities have access to the full functionality and documentation for the product, including instructions, product information (including accessible feature information), documentation, bills and technical support which is provided to individuals without disabilities." In addition, the *Second Report and Order* adopts information, documentation, and training requirements comparable to those in Section 6.11 of the Commission's rules for entities covered by both Section 204 and Section 205 of the CVAA. The *Second Report and Order* also adopts consumer notification requirements for equipment manufacturers of digital apparatus and navigation devices that will require manufacturers to publicize the availability of accessible devices on manufacturer Web sites that must be accessible to those with disabilities. The *Second Report and Order* requires MVPDs, as well as manufacturers, to ensure that the contact office or person listed on their Web site is able to answer both general and specific questions about the availability of accessible equipment, including, if necessary, providing information to consumers or directing consumers to a place where they can locate information about how to activate and use accessibility features.
