SUPPLEMENTARY INFORMATION:

I. Meeting Details

Members of the public may attend and make a statement during the advisory committee meetings. For a better chance to speak at the meetings, please contact the individual listed under **FOR FURTHER INFORMATION CONTACT** by January 15, 2016.

II. Committee Background

The LPAC is a statutorily created committee that advises PHMSA on proposed safety standards, risks assessments, and safety policies for hazardous liquid pipelines (49 U.S.C. 60115). The committee’s activities are subject to the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C. App. 1). The committee consists of 15 members—with membership evenly divided among the federal and state government, the regulated industry, and the public. The committee advises PHMSA on technical feasibility, practicability, and cost-effectiveness of

each proposed pipeline safety standard. PHMSA staff may also provide an update on several regulatory and policy initiatives if time allows.

III. Preliminary Agenda

The agenda will include the committee’s discussion and vote on the proposed rule, “Pipeline Safety: Safety of Hazardous Liquid Pipelines,” published in the **Federal Register** on October 13, 2015, (80 FR 61610) and on the associated regulatory analysis.

The proposed rule includes critical safety improvements for hazardous liquid pipelines and seeks to strengthen the way they are operated, inspected and maintained in the United States.

In this proposed rule, PHMSA addresses effective measures that hazardous liquid operators can take to improve the protection of high consequence areas and other vulnerable areas along their hazardous liquid onshore pipelines. In summary, the proposed rule addresses the following areas:

- Requirements for gravity lines.
- Reporting requirements for gathering lines.
- Inspections of pipelines following extreme weather events.
- Periodic assessments of pipelines not subject to integrity management.
- Pipeline repair criteria.
- Expanded use of leak detection systems.
- Increased use of in-line inspection tools.
- Clarifying other requirements.

Issued in Washington, DC, on January 4, 2016, under authority delegated in 49 CFR 1.97.

Alan K. Mayberry,

Deputy Associate Administrator for Policy and Programs.

SUPPLEMENTARY INFORMATION:

Background

We published a proposed rule elsewhere in today's **Federal Register** to clarify how our existing mandates for the conservation of natural and biological diversity, biological integrity, and environmental health on refuges in Alaska relate to predator control; prohibit several particularly effective methods and means for take of predators; and update our public participation and closure procedures. The proposed rule would not change Federal subsistence regulations or restrict the taking of fish or wildlife for subsistence uses under Federal subsistence regulations. See the proposed rule and associated environmental assessment at <http://www.regulations.gov> at Docket No. FWS-R7-NWRS-2014-0005 for further details.

Open Houses and Public Hearings

We are holding nine open houses and public hearings on the dates listed above in the **DATES** section at the locations listed above in the **ADDRESSES** section. We are holding the public hearings to provide interested parties an opportunity to present verbal testimony (formal, oral comments) or written comments regarding the proposed rule and associated environmental assessment. A formal public hearing is not, however, an opportunity for dialogue with the Service; it is only a forum for accepting formal verbal testimony. In contrast to the public

hearings, the open houses allow the public the opportunity to interact with Service staff, who will be available to provide information and address questions on the proposed rule and the environmental assessment.

We cannot accept verbal testimony at any of the open houses; verbal testimony can only be accepted at the public hearings. Anyone wishing to make an oral statement at a public hearing for the record is encouraged to provide a written copy of their statement to us at the hearing. In the event there is a large attendance, the time allotted for oral statements may be limited. Speakers can sign up at a hearing if they desire to make an oral statement. Oral and written statements receive equal consideration. There are no limits on the length of written comments submitted to us.

Persons with disabilities needing reasonable accommodations to participate in an open house or public hearing should contact Stephanie Brady, Chief of Conservation Planning and Policy, National Wildlife Refuge System, Alaska (see **FOR FURTHER INFORMATION CONTACT**). Reasonable accommodation requests should be received at least 3 business days prior to the open house or public hearing to help ensure availability; American Sign Language or English as a second language interpreter needs should be received at least 2 weeks prior to the open house or public meeting.
