

*Comment 4C:* Ways to enhance the quality, utility, and clarity of the information to be collected:

The Central Flyway Council stated that they believe the surveys are conducted in an appropriate fashion that provides accurate and precise estimates of migratory bird hunter and harvest. They also stated that until alternative methodologies have been developed and vetted, mailing surveys is the sole method for obtaining high-quality information with migratory bird surveys. They noted that this information collection allows individual States to evaluate human-dimension decisions (e.g., timing of seasons, boundaries of hunting zones) related to the States' hunting season selections within the Federal framework for migratory bird seasons.

*Service Response to Comment 4C:* No response required.

*Comment 4D:* Ways to minimize the burden of the collection of information on respondents:

The Central Flyway Council reiterated that they did not believe the surveys caused a significant burden on respondents, but encouraged the examination of methods to reduce the burden of the surveys on respondents, and stated they were willing to work with the Service on any improvements or changes in the future. They further noted that these changes would require appropriate funding for their development and implementation, and also said there is a need to ensure comparability with previous methods.

*Service Response to Comment 4D:* As stated in Service response 2D above, in the next several years, we intend to undertake a critical review of the sampling design of this survey, as part of an effort to modernize our overall data management processes. We will also be moving to an online harvest diary form, which should reduce the burden on respondents by making it easier to fill out and submit the form. We fully intend to involve flyway partners in this modification to the survey, which should allow us to increase sample sizes where needed, while maintaining reliability and accuracy of the survey.

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

Under section 101(b) of the Marine Mammal Protection Act of 1972 (MMPA), as amended (16 U.S.C. 1361–1407), Alaska Natives residing in Alaska and dwelling on the coast of the North Pacific or Arctic Oceans may harvest polar bears, northern sea otters, and Pacific walrus for subsistence or handicraft purposes. Section 109(i) of the MMPA authorizes the Secretary of the Interior to prescribe marking, tagging, and reporting regulations applicable to the Alaska Native subsistence and handicraft take.

On behalf of the Secretary, we implemented regulations at 50 CFR 18.23(f) for Alaska Natives harvesting polar bears, northern sea otters, and Pacific walrus. These regulations enable us to gather data on the Alaska Native subsistence and handicraft harvest and on the biology of polar bears, northern sea otters, and Pacific walrus in Alaska to determine what effect such take may be having on these populations. The regulations also provide us with a means of monitoring the disposition of the harvest to ensure that any commercial use of products created from these species meets the criteria set forth in section 101(b) of the MMPA. We use three forms to collect the information: FWS Form 3–2414 (Polar Bear Tagging Certificates), FWS Form 3–2415 (Walrus Tagging Certificates), and FWS Form 3–2416 (Sea Otter Tagging Certificates). The information we collect includes, but is not limited to:

- Date of kill;
- Sex of the animal;
- Kill location;
- Age of the animal (*i.e.*, adult, subadult, cub, or pup);
- Form of transportation used to make the kill of polar bears;
- Amount of time (*i.e.*, hours/days hunted) spent hunting polar bears;
- Type of take (live-killed or beach-found) for walrus;

- Number of otters present in and number of otters harvested from pod;
- Condition of the polar bear and whether or not bear cubs were present; and
- Name of the hunter or possessor of the specified parts at the time of marking, tagging, and reporting.

We use FWS Form 3–2406 (Registration of Certain Dead Marine Mammal Hard Parts) to record the collection of bones, teeth, or ivory of dead marine mammals by non-Native and Natives not eligible to harvest

marine mammals under the MMPA. It is legal to collect such parts from a beach or from land within a quarter of a mile of the ocean (50 CFR 18.26). The information we collect via Form 3–2406 includes, but is not limited to:

- Date and location found.
- Age, sex, and size of the animal.
- Tag numbers.
- Name, address, phone number, and birthdate of the collector.

**III. Comments**

On February 24, 2017, we published in the **Federal Register** (82 FR 11598) a notice of our intent to request that OMB approve this information collection. In that notice, we solicited comments for 60 days, ending on April 25, 2017. We received one comment in response to that notice:

Email comment dated April 24, 2017 from Marine Mammal Commission.

The Marine Mammal Commission supports the continuation of the information collection programs related to the taking of marine mammals for subsistence and handicraft purposes by Alaska Natives. Collection of this information is authorized under section 109(i) of the Marine Mammal Protection Act. This information is important for tracking Native use of marine mammals and to provide the documentation that marine mammal parts were legally taken.

The Commission also supports the continued use of FWS Form 3–2406 for registering marine mammal hard parts found on beaches and near shore areas. Under applicable regulations, these parts can be retained only if they are registered with the FWS (or NMFS). As such, retention of the registration form is necessary.

*FWS Response:* None required.
