SUPPLEMENTARY INFORMATION:

Introduction

On April 20, 2010, the mobile offshore drilling unit *Deepwater Horizon*, which was being used to drill a well for BP Exploration and Production, Inc. (BP), in the Macondo prospect (Mississippi Canyon 252-MC252), experienced a significant explosion, fire, and subsequent sinking in the Gulf of Mexico, resulting in an unprecedented volume of oil and other discharges from the rig and from the

wellhead on the seabed. The DWH oil spill is the largest offshore oil spill in U.S. history, discharging millions of barrels of oil over a period of 87 days. In addition, well over 1 million gallons of dispersants were applied to the waters of the spill area in an attempt to disperse the spilled oil. An undetermined amount of natural gas was also released into the environment as a result of the spill.

The Trustees conducted the natural resource damage assessment (NRDA) for the DWH oil spill under the Oil Pollution Act 1990 (OPA; 33 U.S.C. 2701 *et seq.*). Pursuant to OPA, Federal and State agencies act as trustees on behalf of the public to assess natural resource injuries and losses and to determine the actions required to compensate the public for those injuries and losses. The OPA further instructs the designated trustees to develop and implement a plan for the restoration, rehabilitation, replacement, or acquisition of the equivalent of the injured natural resources under their trusteeship to baseline (the resource quality and conditions that would exist if the spill had not occurred). This includes the loss of use and services provided by those resources from the time of injury until the completion of restoration.

The DWH Trustees are:

- U.S. Department of the Interior (DOI), as represented by the National Park Service, U.S. Fish and Wildlife Service, and Bureau of Land Management;
- National Oceanic and Atmospheric Administration (NOAA), on behalf of the U.S. Department of Commerce;
- U.S. Department of Agriculture (USDA);
- U.S. Environmental Protection Agency (EPA);
- State of Louisiana Coastal Protection and Restoration Authority, Oil Spill Coordinator's Office, Department of Environmental Quality, Department of Wildlife and Fisheries, and Department of Natural Resources;
- State of Mississippi Department of Environmental Quality;
- State of Alabama Department of Conservation and Natural Resources and Geological Survey of Alabama;
- State of Florida Department of Environmental Protection and Fish and Wildlife Conservation Commission; and
- State of Texas: Texas Parks and Wildlife Department, Texas General Land Office, and Texas Commission on Environmental Quality.

On April 4, 2016, the United States District Court for the Eastern District of Louisiana entered a Consent Decree resolving civil claims by the Trustees against BP arising from the DWH oil spill: *United States v. BXP et al.*, Civ.

No. 10–4536, centralized in MDL 2179, In re: Oil Spill by the Oil Rig “Deepwater Horizon” in the Gulf of Mexico, on April 20, 2010 (E.D. La.) (<http://www.justice.gov/enrd/deepwater-horizon>). Pursuant to the Consent Decree, restoration projects in the Louisiana Restoration Area are chosen and managed by the LA TIG. The LA TIG is composed of the following Trustees: State of Louisiana Coastal Protection and Restoration Authority, Oil Spill Coordinator’s Office, Departments of Environmental Quality, Wildlife and Fisheries, and Natural Resources; DOI; NOAA; EPA; and USDA.

Background

The Final PDARP/PEIS provides for TIGs to propose restoration projects using a planning process that involves phasing restoration projects across multiple restoration plans. A TIG may propose funding a planning phase (e.g., initial engineering and design (E&D)) in a restoration plan for a conceptual project (phase 1). This allows the TIG to develop information needed to fully consider a subsequent implementation phase of the project in a future restoration plan (phase 2). In the Draft RP/EA #7, the LA TIG considers alternatives to fund E&D for conceptual projects and also to fund projects for implementation.

Overview of the LA TIG Draft RP/EA #7

The Draft RP/EA #7 provides the LA TIG’s analysis of alternatives under the “Wetlands, Coastal, and Nearshore Habitats” restoration type and the “Birds” restoration type. Under the “Wetlands, Coastal and Nearshore Habitats” restoration type, the preferred alternatives include a conceptual project that would undergo E&D if selected, and two alternatives that are analyzed for full implementation if selected. These alternatives are: (1) Bird’s Foot Delta Hydrologic Restoration project (E&D), (2) Terrebonne Basin Ridge and Marsh Creation Project: Bayou Terrebonne Increment (Terrebonne project) (full implementation) and (3) Grande Cheniere Ridge Marsh Creation (full implementation).

The Terrebonne project was approved and funded for E&D in the 2017 *Louisiana Trustee Implementation Group Final Restoration Plan #1: Restoration of Wetlands, Coastal, and Nearshore Habitats; Habitat Projects on Federally Managed Lands; and Birds*. The other, Bayou Grand Cheniere Ridge and Marsh Creation project underwent E&D through a separate funding process. Both projects have reached a stage in their E&D where sufficient information

has been developed for analysis under NEPA and the OPA NRDA regulations.

Under the “Birds” restoration type, the LA TIG proposes conceptual projects that would undergo E&D if selected for funding. The preferred “Birds” alternatives are (1) Isle au Pitre Restoration, and (2) Terrebonne Houma Navigation Canal Island Restoration.
